Advances in Computer and Computational Sciences Sanjiv K. Bhatia, Krishn K. Mishra, Shailesh Tiwari, Vivek Kumar Singh, 2017-10-03 Exchange of information and innovative ideas are necessary to accelerate the development of technology With advent of technology intelligent and soft computing techniques came into existence with a wide scope of implementation in engineering sciences Keeping this ideology in preference this book includes the insights that reflect the Advances in Computer and Computational Sciences from upcoming researchers and leading academicians across the globe It contains high quality peer reviewed papers of International Conference on Computer Communication and Computational Sciences ICCCS 2016 held during 12 13 August 2016 in Ajmer India These papers are arranged in the form of chapters The content of the book is divided into two volumes that cover variety of topics such as intelligent hardware and software design advanced communications power and energy optimization intelligent techniques used in internet of things intelligent image processing advanced software engineering evolutionary and soft computing security and many more This book helps the perspective readers from computer industry and academia to derive the advances of next generation computer and communication technology and shape them into real life applications **KfK**, 1994 Goddard Conference on Mass Storage Systems and Technologies, Volume 1, 1993 **Proceedings of the 4th International Conference on Cognitive and Intelligent Computing—Volume 1** Amit Kumar, Gheorghita Ghinea, Suresh Merugu, 2026-01-01 This book presents original peer reviewed select articles from the International Conference on Cognitive Intelligent Computing ICCIC 2024 held on November 29 30 2024 at Hyderabad in India The proceedings has cutting edge research outcome related to machine learning in control applications soft computing pattern recognition decision support systems text analytics and NLP statistical learning neural network learning learning through fuzzy logic learning through evolution evolutionary algorithms reinforcement learning multi strategy learning cooperative learning planning and learning multi agent learning online and incremental learning scalability of learning algorithms inductive learning inductive logic programming Bayesian networks support vector machines case based reasoning multi agent systems human computer interaction data mining and knowledge discovery knowledge management and networks data intensive computing architecture medicine health bioinformatics and systems biology industrial and engineering applications security applications smart cities game playing and problem solving intelligent virtual environments economics business and forecasting applications Articles in the book are carefully selected on the basis of their application orientation The content is expected to be especially useful for professionals researchers and research students working in the area of cognitive and intelligent computing **Proceedings of the 6th International Conference on Advance Computing and Intelligent Engineering** Bibudhendu Pati, Chhabi Rani Panigrahi, Prasant Mohapatra, Kuan-Ching Li, 2022-09-21 This book gathers high quality research papers presented at the 6th International Conference on Advanced Computing and Intelligent Engineering ICACIE 2021 organized by Bhubaneswar Institute of

Technology Bhubaneswar Odisha India during December 23 24 2021 It includes sections describing technical advances and the latest research in the fields of computing and intelligent engineering Intended for graduate students and researchers working in the disciplines of computer science and engineering the proceedings also appeal to researchers in the field of electronics as they cover hardware technologies and future communication technologies *Advances In Computers* Marvin Zelkowitz,2000 **Advances in the Applications of Computers in Hospital Management** University of Michigan. Engineering Summer Conferences,1967 Midwinter Meeting Program ,1987 Communicating Process Architectures 2004 Ian East,J. Martin,P.H. Welch,2004 Communicating Process Architecture CPA describes an approach to system development that is process oriented It makes no great distinction between hardware and software It has a major root in the theory of Communicating Sequential Processes CSP However the underlying theory is not limited to CSP The importance of mobility of both channel and process within a network sees integration with ideas from the calculus Other formalisms are also exploited such as BSP and MPI The focus is on sound methods for the engineering of significant concurrent systems including those that are distributed across the Internet or within a single chip and or software scheduled on a single execution unit Traditionally at CPA the emphasis has been on theory and practice developing and applying tools based upon CSP and related theories to build high integrity systems of significant size In particular interest focuses on achieving scalability and security against error The development of Java C and C libraries to facilitate secure concurrent programming using mainstream languages has allowed CPA to continue and proliferate This work continues in support of the engineering of distributed applications Recently there has been greater reference to theory and its more direct application to programming systems and languages In this volume the formal CSP is very well presented The papers provide a healthy mixture of the academic and commercial software and hardware application and infrastructure which reflects the nature of the discipline **Transactions on Rough Sets I** James F. Peters,Jerzy W. Grzymala-Busse,Bozena Kostek,Roman W. Swiniarski,Marcin S. Szczuka,2004-10-27 The LNCS journal Transactions on Rough Sets is devoted to the entire spectrum of rough sets related issues starting from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining knowledge discovery and intelligent information processing to relations between rough sets and other approaches to uncertainty vagueness and incompleteness such as fuzzy sets and theory of evidence This first volume of the Transactions on Rough Sets opens with an introductory article by Zdzislaw Pawlak the originator of rough sets Nine papers deal with rough set theory and eight are devoted to applications in various domains **Advances in Computers** Marvin Zelkowitz,2011 This series since its first volume in 1960 and now the oldest series still being published covers new developments in computer technology Each volume contains from 5 to 7 chapters and 3 volumes are produced annually Most chapters present an overview of a current subfield within computer science include many citations and often new developments in the field by the authors of the individual chapters Topics include hardware software web technology

communications theoretical underpinnings of computing and novel applications of computers The book series is a valuable addition to university courses that emphasize the topics under discussion in that particular volume as well as belonging on the bookshelf of industrial practitioners who need to implement many of the technologies that are described In depth surveys and tutorials on new computer technology Well known authors and researchers in the field Extensive bibliographies with most chapters Many of the volumes are devoted to single themes or subfields of computer science

Rathore,Sachin Chirgaiya,2023-10-23 Human society is ushering into an intelligent society from an information society in which computing has become a key element in formulating and promoting the development of society In the new era of digital civilization with the internet of all things traditional computing on data is far from being able to meet the growing endeavour for a higher level of intelligence by humans The growing interest in intelligent computing coupled with the development of computing science the intelligent perception of the physical world and the understanding of the cognitive mechanism of human consciousness has collectively elevated the intelligence level of computing and accelerated the discovery and creation of knowledge Intelligent computing is task oriented it matches computing resources and realizes automatic demand calculation and precise system reconstruction The

system architecture is constantly adjusted to the task execution Directed coupling reconstruction is performed at the software and hardware levels Automation of the computing process includes automatic resource management and scheduling automatic service creation and provision and automatic management of the task life cycle which is the key to evaluating the friendliness availability and service of intelligent computing The precision of computing results anchors computing services besides it solves difficulties including fast processing of computing tasks and timely matching of computing resources The book is collection of selected papers accepted for presentation during Avdharan 2023 The objective is to highlight the research pursued by scholars these days in India It is likely that these researches may give insight for future research and fraternity of researchers is benefitted
