Lynn (jr.),Carolyn J. Heinrich,Carolyn J. Hill,2001 Policymakers and public managers around the world have become preoccupied with the question of how their goals can be achieved in a way that rebuilds public confidence in government Yet because public policies and programs increasingly are being administered through a complicated web of jurisdictions agencies and public private partnerships evaluating their effectiveness is more difficult than in the past Though social scientists possess insightful theories and powerful methods for conducting empirical research on governance and public management their work is too often fragmented and irrelevant to the specific tasks faced by legislators administrators and managers Proposing a framework for research based on the premise that any particular governance arrangement is embedded in a wider social fiscal and political context Laurence E Lynn Jr Carolyn J Heinrich and Carolyn J Hill argue that theory based empirical research when well conceived and executed can be a primary source of fundamental durable knowledge about governance and policy management Focusing on complex human services such as public assistance child protection and public education they construct an integrative multilevel logic of governance that can help researchers increase the sophistication power and relevance of their work **Long Range Planning** Strategic Planning Society,2000 **Choice** ,2000 *American Intergovernmental Relations* Laurence J.
