CULTURAL CAPITALISM

Literature and the Market

Cultural Capitalism:

Cultural Capitalism Bradley A. Gorski, 2025-03-15 Cultural Capitalism explores Russian literature's eager embrace of capitalism in the post-Soviet era. When the Soviet Union fell, books were suddenly bought and sold as commodities. Russia's first bestseller lists brought attention and prestige. Even literary prizes turned to the market for legitimacy. The rise of capitalism entirely transformed both the economics and the aesthetics of Russian literature. By reconstructing the market's influence on everything from late Soviet paper shortages to the prose of neoimperialism, Cultural Capitalism reveals Russian literature's exuberant hopes for and deep disappointments in capitalism. Only a free market, it was hoped, could cure endemic book deficits and liberate literature from ideological constraints. But as the market came to dominate literature, it imposed an ideology of its own, one that directed literary development for decades. Through archival research, original interviews, and provocative readings of literary texts, Bradley A. Gorski immerses the reader in both the economic and aesthetic worlds of post-Soviet Russian literature to reveal a cultural logic dominated by capitalism. The Russian 1990s and early 2000s saw markets introduced, adopted, and debated at an accelerated pace, all against the backdrop of a socialist past. Staging the polemics between capitalism and culture in high drama and sharp relief, But the market forces at the center of the post-Soviet transition are fundamental to cultural trends worldwide. By revealing the complexities of Russia's story, Cultural Capitalism mounts a critique that cuts across national borders and provides a new way of seeing culture in the post-1989 era worldwide.

College Choice in China Lan Gao, 2011-08-16 Educational researchers have long been concerned about the factors that influence the patterns of attendance in higher education and the extent to which higher education has been accessible to all students, regardless of their socioeconomic status. Drawing on cultural capital theory, this study aims at analyzing how students' college choice process varies by social class in China. By exploring different cultural and financial factors that influence different stages of students' college choice process, this study hopes to contribute to identifying the most appropriate policies and practices for raising the representation of students from the lowest social class among college participants. **Social Economy of the Metropolis**
