Cultural Collisions Postmodern Technoscience:

Cultural Collisions Raphael Sassower, 2013-01-11 In *Cultural Collisions* Raphael Sassower brings postmodernism face to face with technoscience and considers the viability of public works such as the Superconducting Supercollider in a postmodern age. Contending that technoscientific projects are contingent upon economic and political support and not simply upon their scientific feasibility, Sassower illuminates the cultural context of postmodern technoscience via a vis an examination of postmodernism and the philosophy of late 20th century science. [The Cambridge Companion to Postmodernism](#) Steven Connor, 2004-07-15 The *Cambridge Companion to Postmodernism* offers a comprehensive introduction to postmodernism. The Companion examines the different aspects of postmodernist thought and culture that have had a significant impact on contemporary cultural production and thinking. Topics discussed by experts in the field include postmodernism's relation to modernity and its significance and relevance to literature, film, law, philosophy, architecture, religion, and modern cultural studies. The volume also includes a useful guide to further reading and a chronology. This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its incarnations. Accessible and comprehensive, this Companion addresses the many issues surrounding this elusive, enigmatic, and often controversial topic. [The A to Z of Postmodernist Literature and Theater](#) Fran Mason, 2009-07-23 *The A to Z of Postmodernist Literature and Theater* examines the different areas of postmodernist literature and theater and the variety of forms that have been produced. It contains a list of acronyms, a chronology, an introductory essay, a bibliography, and several hundred cross-referenced dictionary entries on individual writers, important aesthetic practices, significant texts, and important movements and ideas that have created a variety of literary approaches within the form. By placing these concerns within the historical, philosophical, and cultural contexts of postmodernism, this reference explores the frameworks within which postmodernist literature of the late twentieth and early twenty-first centuries operates. **Book Jacket** *Unity Of Nature, The: Wholeness And Disintegration In Ecology And Science* Alan Marshall, 2002-10-04 The idea behind *The Unity of Nature* is a strong theoretical theme in a number of scientific and environmental fields, from ecosystems, ecology, through quantum physics to environmental philosophy and ecopolitics, giving rise to an inspiring, optimistic, socially responsive, and environment-friendly worldview. The fields of science and environmentalism have inherited this theme of natural unity through an intellectual lineage that encompasses many non-scientific and non-environmental fields such as sociology, theology, and political philosophy. Many of these fields have used natural unity in a way which is in stark opposition to the metaphysical and political desires of those who promulgate the unity of nature for progressive social change. This book discusses how this has transpired and examines the social and intellectual processes that have been at work. These include the social construction of the Organicism versus Mechanicism debate in ecology, the intellectual links between neo-classical economic principles and the New Sciences, the techno-scientific background of Gaia theory, and the social conservatism of

ecological functionalism *French Philosophy of Technology* Sacha Loeve, Xavier Guchet, Bernadette Bensaude Vincent, 2018-05-28 Offering an overall insight into the French tradition of philosophy of technology this volume is meant to make French speaking contributions more accessible to the international philosophical community The first section Negotiating a Cultural Heritage presents a number of leading 20th century philosophical figures from Bergson and Canguilhem to Simondon Dagognet or Ellul and intellectual movements from Personalism to French Cybernetics and political ecology that help shape philosophy of technology in the Francophone area and feed into contemporary debates ecology of technology politics of technology game studies The second section Coining and Reconfiguring Technoscience traces the genealogy of this controversial concept and discusses its meanings and relevance A third section Revisiting Anthropological Categories focuses on the relationships of technology with the natural and the human worlds from various perspectives that include anthropotechnology Anthropocene technological and vital norms and temporalities The final section Innovating in Ethics Design and Aesthetics brings together contributions that draw on various French traditions to afford fresh insights on ethics of technology philosophy of design techno aesthetics and digital studies The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions **Cultural Collisions**, 1980 **Postmodern Studies**, 2003 Constructivism and Practice Carol C.
