world and how genes economics social conditions and climate jointly shape personality

**Anthropological Theory** Robert Alan Manners,David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica

*Psychological Anthropology; Approaches to Culture and Personality* Francis L. K. Hsu,2017-08-07 The purpose of this volume is twofold On the one hand it is an assessment of the up to date gains in the field of culture and personality Each of the contributors tries to achieve comprehensiveness within the scope of his particular assignment Insofar as possible each brings together materials from diverse sources from obscure journals to their own yet unpublished field notes On the other hand each of them also attempts to indicate some of the most important problems yet to be tackled All the contributors outline some of these problems the hypotheses and methods most relevant to their investigation and possible solution The American tradition in textbooks is that they contain materials from the beaten paths and are exercises in facts and principles generally endorsed by most or all scholars Such a tradition fails to introduce the student to the vitality of an expanding and exciting discipline This book is a textbook but there will be many controversial spots in it The reader will find no complete agreement among the contributors nor between the contributors and the editor This is a text in which differences in facts theories and points of view are not only pointed out but also explored at some length leading in some instances even to almost diametrically contrasting conclusions between the authors Proceedings of IAC-MEM 2017 group of authors,2017-04-11 International Academic Conference on Management Economics and Marketing in Budapest Hungary
