**Culture and Domination** John Brenkman, 2019-05-15 In *Culture and Domination* John Brenkman delineates the link between cultural interpretation and social theory through a forceful critical reassessment of hermeneutics Marxism and psychoanalysis He challenges the claim of traditional hermeneutics that culture is a realm of meaning and value set apart from social relations of domination and power The alternative hermeneutics he advocates builds on Marxism and psychoanalysis but also disputes some of their most basic premises and concepts

**The Columbia Dictionary of Modern Literary and Cultural Criticism** Joseph W. Childers, Gary Hentzi, 1995 More than 450 definitions aimed at helping those not formally trained in theory or criticism

**Monster Culture in the 21st Century** Marina Levina, Diem-My T. Bui, 2013-05-23 In the past decade our rapidly changing world faced terrorism global epidemics economic and social strife new communication technologies immigration and climate change to name a few These fears and tensions reflect an evermore interconnected global environment where increased mobility of people technologies and disease have produced great social political and economical uncertainty The essays in this collection examine how monstrosity has been used to manage these rising fears and tensions Analyzing popular films and televisions shows such as *True Blood* *Twilight* *Paranormal Activity* *District 9* *Battlestar Galactica* and *Avatar* it argues that monstrous narratives of the past decade have become omnipresent specifically because they represent collective social anxieties over resisting and embracing change in the 21st century The first comprehensive text that uses monstrosity not just as a metaphor for change but rather a necessary condition through which change is lived and experienced in the 21st century this approach introduces a different perspective toward the study of monstrosity in culture

**Culture and International History** Jessica C. E. Gienow-Hecht, Frank Schumacher, 2004 Combining the perspectives of 18 international scholars from Europe and the United States with a critical discussion of the role of culture in international relations this volume introduces recent trends in the study of Culture and International History It systematically explores the cultural dimension of international history mapping existing approaches and conceptual lenses for the study of cultural factors and thus hopes to sharpen the awareness for the cultural approach to international history among both American and non American scholars The first part provides a methodological introduction explores the cultural underpinnings of foreign policy and the role of culture in international affairs by reviewing the historiography and examining the meaning of the word culture in the context of foreign relations In the second part contributors analyze culture as a tool of foreign policy They demonstrate how culture was instrumentalized for diplomatic goals and purposes in different historical periods and world regions The essays in the third part expand the state centered view and retrace informal cultural relations among nations and peoples This exploration of non state cultural interaction focuses on the role of science art religion and tourism The fourth part collects the findings and arguments of part one two and three to define a roadmap for further scholarly inquiry A group of commentators survey the preceding essays place them into a larger research context and

[The Best Books for Academic Libraries: Social sciences](#) ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers *Trading Places* Madeleine Dobie,2010 In *Trading Places* Madeleine Dobie explores the place of the colonial world in the culture of the French Enlightenment She shows that until a turning point in the late 1760s questions of colonization and slavery occupied a very marginal position in literature philosophy and material and visual culture In an exploration of the causes and modalities of

this silence Dobie traces the displacement of colonial questions onto two more familiar and less ethically challenging aspects of Enlightenment thought exoticization of the Orient and fascination with indigenous Amerindian cultures Expanding the critical analysis of the cultural imprint of colonization to encompass commodities as well as texts Dobie considers how tropical raw materials were integrated into French material culture In an original exploration of the textile and furniture industries Dobie considers consumer goods both as sites of representation and as vestiges of the labor of the enslaved Turning to the closing decades of the eighteenth century Dobie considers how silence evolved into discourse She argues that sustained examination of the colonial order was made possible by the rise of economic liberalism which attacked the prevailing mercantilist doctrine and formulated new perspectives on agriculture labor including slavery commerce and global markets Questioning recent accounts of late Enlightenment anticolonialism she shows that late eighteenth century French philosophers opposed slavery while advocating the expansion of a liberalized colonial order Innovative and interdisciplinary *Trading Places* combines literary and historical analysis with new research into political economy and material culture

**Asymmetrical Neighbors** Enze Han,2019-08-12 Departing from existing literature on state building this book proposes a novel theoretical approach that looks beyond the confines of state borders Instead of looking at state building as a process determined by domestic factors such as war preparation political institutions and geographic and demographic variables *Asymmetrical Neighbors* argues that we should conceptualize state building as an interactive process heavily influenced by a neighborhood effect Ultimately this book tells the story of the success and failure in state and nation building across the common borderland area between China Myanmar and Thailand **What is Schizophrenia?** William F. Flack,Daniel R. Miller,Morton Wiener,1991 William F Flack Jr Daniel R Miller and Morton Wiener What is schizophrenia | This was the seemingly simple question posed to a diverse group of investigators asked to present their views at a conference sponsored by the Frances L Hiatt School of Psychology at Clark University Worcester Massachusetts in June 1990 The plan was to have a small group of theoretically minded clinicians and investigators from different professions and orientations convene to discuss and debate conceptual and metatheoretical issues surrounding schizophrenia Instead of concentrating on the latest empirical findings we were primarily interested in having a series of exchanges 2 about the very different meanings and uses of this concept In our review of the literature on schizophrenia we uncovered what seemed to us to be multiple non overlapping uses of the term For some investigators it appears to be used to specify certain kinds of people for others it is employed to refer to certain kinds of behaviors For still others the term is grounded in biochemical events or in

socioculturally specific actions A number of alternatives are explored in the contributors papers in this volume
