Specifically, the issues that are studied include large deviation, deviation inequalities, local sensitivity of model misspecification in likelihood inference, empirical likelihood, confidence intervals, uniform convergence rates in density estimation, randomized designs in clinical trials, MCMC and EM algorithms, approximation of p values in multipoint linkage analysis, use of mixture models in genetic studies, and design and analysis of quantitative traits.

**Women's Movements in Post-"Arab Spring" North Africa** Fatima Sadiqi, 2016-05-23 Centering on women's movements before, during, and after the revolutions, *Women's Movements in Post Arab Spring North Africa* highlights the broader sources of authority that affected the emergence of new feminist actors and agents and their impact on the sociopolitical landscapes of the region.

Instrumental Autonomy, Political Socialization, and Citizenship Identity Mengyan (Yolanda) Yu, 2016-10-27 This book offers essential insights into Chinese Korean minority youth citizenship identity development during their high school and university education period out of their political socialization experience. It investigates how they develop their citizenship identity with the state through bilingual education and media exposure as an outcome of the entangled relationship between state power and economic globalization. The book demonstrates to readers how to apply the abstract conceptual framework of identity politics and ideology construction nurtured by both civil culture and political involvement to a specific case with operationalized measurement extracted from political socialization concepts so as to understand and rationalize identity development. This approach offers both an in-depth way to penetrate further in the discourse construction that shapes identity politics and an innovative means of measuring and explaining relevant relationships.
