Unwrapping Japan Eyal Ben-Ari, Brian Moeran, Jim Valentine, 2010-10-18 Recent years have witnessed an explosive growth in the literature published about Japan Yet it seems that the more that is written about Japan and Japanism its culture society people the more mysterious it becomes As well as exploring issues relating to advertising tourism women festivals and the art world the book depicts how

the study of Japanese society contributes to anthropological theory and understanding The editors use the term unwrapping to provide insights into Japanese culture and relate these insights to broader problems and questions prevalent in contemporary anthropological discourse The issues explored include the contribution of applied anthropology to theory the relationship between tourism and nostalgia the interplay of marginality and belonging the role of advertising in gender relations status in the art world and the place of Japanese genres of writing within anthropology texts

Eastern Christians in Anthropological Perspective Chris Hann, Hermann Goltz, 2010-05-27 This collection of essays is a welcome and refreshing gift in a virtual desert There has been very little comparative anthropological research on the Eastern churches and this volume will fill that gap Michael Herzfeld author of *Evicted from Eternity The Restructuring of Modern Rome* At long last there is a book on the anthropology of Christianity that devotes direct and sustained attention to the diverse Eastern Christian Churches both Orthodox and Catholic This book should be read by anyone who thinks

anthropologically about Christianity Scales will fall from their eyes and they will behold an entire wing of Christianity that has until now gone mostly unnoticed and practically untheorized Douglas Rogers author of *The Old Faith and the Russian Land A Historical Ethnography of Ethics in the Urals*

An Anthropological Perspective on Indian Society N. Sudhakar Rao, 2025-06-30 Indian society with its blend of ancient grandeur and modernity faces significant social and gender inequalities similar to many traditional societies around the world This volume highlights these aspects of human life through empirical anthropological research conducted over the past four decades In India individuals cannot escape the inequalities stemming from gender ethnic and social hierarchies Living in such a context often involves struggling to survive or maintain a higher status This volume addresses these issues based on the empirical realities of life among various populations in different geographical regions of India while also considering their historical roots

Anthropological Perspectives on Global Challenges Emma Gilberthorpe, 2024-03-28 This volume offers a snapshot of anthropological perspectives on global challenges Whilst it could not hope to represent the full scope of anthropological perspectives those that are presented highlight some of the critical flaws embedded in such an all encompassing notion The contributors reveal the possibilities of reimagining the ways in which challenges are understood and addressed and demonstrate how a combination of deep understanding of the past and collaboration cooperation and inclusive dialogue about the future can improve the chances of positive action The collection thus not only shows us that perspectives must change but also how that change might be realised Whilst the chapters are authored solely by anthropologists this book is not solely for anthropologists The book is illustrative of the practical and theoretical insights that anthropology can offer those individuals teams and policy and decision makers engaged in research mitigation and or intervention practices in relation to the global challenges Beyond academia it contributes to broader understandings of the challenges we collectively face at this point in time and how we might collectively and effectively address them

Coulter,W. Schumann,2012-09-03 By assembling original ethnographically grounded research in legislatures executives and bureaucracies this volume illuminates and unpacks the structures practices and values of government actors in local regional and national contexts **Anthropology of the Self** Brian Morris,1994 Western society is individualised we feel at ease talking about individuals and we study individual behaviour through psychology and psychoanalysis Yet anthropology teaches us that an individual approach is only one of many ways of looking at ourselves In this wide ranging text Morris explores the origins doctrines and conceptions of the self

in Western Asian and African societies passing through Greek philosophy Buddhism Hinduism Confucianism Tao and African philosophy and ending with contemporary feminism Scholarly and written in a lucid style free of jargon this work is written from an anthropological perspective with an interdisciplinary approach Morris emphasises the varying conceptions of the self found cross culturally and contrasts these with the conceptions found in the Western intellectual traditions **Other Ways of Growing Old** Pamela T. Amoss, Stevan Harrell, 1981 As anthropologists we offer this book about aging in a wide variety of human societies in the hope of its making three contributions First this book will help to remedy a massive neglect of old age by the discipline of anthropology The pioneering work of Leo Simmons 1945 has remained a lonely monument since the 1940s for despite recent interest in the subject of aging in modern Western societies on the part of social gerontologists and sociologists little has been done by anthropologists on aging in non Western societies Where it has been treated at all it has been in the form either of a few final paragraphs in the discussion of the life cycle or of a simple ethnographic fact among other facts about a certain social system What has been missing has been any attempt to put aging in a cross cultural or comparative perspective to give this vital subject the same treatment that has been accorded marriage for example or death or inheritance or sex roles Second this book will bring a needed cross cultural perspective to the study of social gerontology The recent explosion of interest in this field has been largely confined to the study of aging in North America and Europe But we anthropologists feel that such a culturally limited study though interesting and productive in its own right is dangerously narrow if it does not consider what aging is like in other societies What aspects of aging for example are human universals and have to be planned for as inevitable and what aspects are cultural particulars and can be avoided modified or strengthened under certain social conditions By presenting both a biological account of the universals of human aging Weiss and specific ethnographic accounts of aging in a wide variety of societies we believe we can help to put North American aging into perspective Third we hope this book will serve as an illustration of a particular anthropological approach to unity and diversity in human societies and cultures Perhaps the main task of sociocultural anthropology is a twofold one the explanation of cross cultural universals somehow rooted either in the biological nature of the human species or in universal imperatives of social organization and the explanation of intercultural variations rooted in a dialectical interaction between culture and the material conditions partially created by culture in which it exists If unity and diversity can indeed be explained in this way the cross cultural study of aging can serve as a paradigm By first setting out what seem to be the universals determined by the biology of the human species and by then exploring the range of variation in cultural solutions we ought to be able to formulate a set of principles that will allow us to explain why variations occur in a certain way Nine ethnographic case studies are enough we believe to enable us to formulate some preliminary hypotheses about the nature and causes of variation in the social process of aging **Anthropological Perspectives**, 1977 *Race, Nature and Culture* Peter Wade, 2002-06-20 Since the controversial scientific race theories of the 1930s anthropologists have generally

avoided directly addressing the issue of race viewing it as a social construct Challenging this tradition Peter Wade proposes that anthropologists can in fact play an important role in the study of race Wade is critical of contemporary theoretical studies of race formulated within the contexts of colonial history sociology and cultural studies Instead he argues for a new direction one which anthropology is well placed to explore Taking the study of race beyond Western notions of the individual Wade argues for new paradigms in social science in particular in the development of connections between race sex and gender An understanding of these issues within an anthropological context he contends is vital for defining personhood and identity Race is often defined by its reference to biology blood genes nature or essence Yet these concepts are often left unexamined Integrating material from the history of science science studies and anthropological studies of kinship and new reproductive technologies as well as from studies of race Peter Wade explores the meaning of such terms and interrogates the relationship between nature and culture in ideas about race *American Culture* Lucy R. Garretson,1976
