,1978 *Personality and the Cultural Construction of Society* David K. Jordan, Marc J. Swartz, 2010-05-31 Psychological anthropology is a vital area of contemporary social science and one of the field's most important and innovative thinkers is Melford E. Spiro. This volume brings together sixteen essays that review Spiro's theoretical insights and extend them into new areas. The essays center on several general problems: In what ways is it meaningful to speak of a social act as having functions? What elements and processes of human personality are universal and why? What is the relationship between religion and personality? Why? What are the psychological underpinnings of social manipulation? **The Oxford Handbook of Education and Globalization** Paola Mattei, Xavier Dumay, Eric Mangez, Jacqueline Behrend, 2023 The Oxford Handbook on Education and Globalization brings together in a unique way leading authors in social theory and in political science and reflects on how these two disciplines deal with the relation between globalization and education. The handbook develops a firmer and tighter dialogue between social theory and education research and analyzes the political and institutional factors that shape the adoption of global reforms in education at multiple levels of governance. It is a must read for anyone looking for a comprehensive overview of how globalization and education interact to result in distinct and varying outcomes across world regions. **Handbook of Ethnography** Paul Atkinson, Sara Delamont, Amanda Coffey, John Lofland, Lyn Lofland, 2007-04-25 I wish the Handbook of Ethnography had been available to me as a fledgling ethnographer. I would recommend it for any graduate student who contemplates a career in the field. Likewise for experienced ethnographers who would like the equivalent of a world atlas to help pinpoint their own locations in the field. *Journal of Contemporary Ethnography* No self-respecting qualitative researcher should be without Paul Atkinson's handbook on ethnography. This really is encyclopaedic in concept and scope. Many big names in the field have contributed, so this has to be the starting point for anyone looking to understand the field in substantive topic, theoretical tradition, and methodology. SRA News Ethnography is one of the chief research methods in sociology, anthropology, and other cognate disciplines in the social sciences. This Handbook provides an unparalleled critical guide to its principles and practice. The volume is organized into three sections. The first systematically locates ethnography firmly in its relevant historical and intellectual contexts. The roots of ethnography are pinpointed, and the pattern of its development is demonstrated. The second section examines the contribution of ethnography to major fields of substantive research. The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly. The third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments. The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars. The Handbook of Ethnography provides readers with a one-stop critical guide to the past, present, and future of ethnography. It will quickly establish itself as the ethnographer's bible. *To See Ourselves* Zhongdang Pan, Steven H. Chaffee, Godwin C. Chu, Yanan Ju, 2019-08-22 This study compares the ever-changing cultural values of contemporary China and the contemporary United

States Surveying 2000 Shanghai area residents and villagers as well as 2500 US citizens the authors examine to what extent there has been a loss of traditional values in the United States The book looks at value systems in both cultures associated with family relationships kinship ties male female relationships and general interpersonal relationships the fundamental social relationships comprising the social fabric of a society The authors conclude that although both societies have experienced changes in this century they have followed quite different paths In exploring the extent to which this process has differed the authors address the following questions what traditional Confucian values persist in China after 40 years of communist indoctrination and the recent invasion of Western culture How are fundamental human relationships viewed in the United States How do these two societies differ today both in adherence to traditional values and in the dynamics of value change These and many more issues are explored

Chamulas in the World of the Sun Gary H. Gossen,1984 The oral tradition of the Chamula people in southern Mexico is rich and varied in its humor detail style imagery and insight Descendants of the Ancient Maya the Chamulas use language in a way that expresses their special understanding of the social and cosmic order to which they belong The Sun Christ deity presides over this universe In this innovative study in anthropology and folklore Gary Gossen offers a brilliant analysis of the cosmology symbolism and verbal behavior of the Chamulas based upon his systematic collections of their oral traditions within the framework of their own folk classification scheme of language Not surprisingly the underlying structure of Chamula categories of time and space also provides an important key to understanding the style structure and performance of their folklore Cosmology is thus used in this book as a metalanguage for reporting and analyzing another language the reservoir of symbols and information in Chamula oral tradition Mr Gossen s analysis runs the gamut from children s improvised games and songs through court language and oratory to the appropriate language for joking gossip sacred narrative prayer and ritual formulas In addition his description and analysis are augmented by more than 180 abstracts of narrative texts and several original Chamula drawings There is a good chance that this book may come to be regarded as a classic in the field of symbolic analysis of myth and oral tradition There are few if any published studies dealing with such a superb collection of texts and supporting ethnographic materials Gary H Gossen teaches anthropology at the University of California Santa Cruz Amazon

An investigation of the way a segment of the ethnic minority youth in China overcomes staggering obstacles to achieve educational success and admittance to universities The book suggests how the micro and macro level strategies and

initiatives that facilitate this success might be adopted in other educational settings Immigrants and the Formation of Community David Bibas, 1998 The United States has experienced since the mid 60 s a new wave of immigration comparable in importance to the mass migration of the turn of the century It is a significant population influx which as its predecessor will shape the character of the country in the future However the more recent arrivals are very different from the huddled masses who came to this country in the early part of this century and the society receiving them has also undergone significant transformations Yet images of immigrants and the concepts used to evoke their encounter with the new environment have remained very much the same The present work attempts to provide a different approach to the study of the immigrants response to this encounter by looking at their process of transformation from immigrants to ethnics
