**The Second Language Acquisition of French Tense, Aspect, Mood and Modality** Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This

monograph addresses this question by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications

**Narrative Development in a Multilingual Context** Ludo Th Verhoeven, Sven Strömqvist, 2001-01-01 In this volume the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed It is explored what operating principles underlie the process of narrative production in L1 and L2 Developmental relations between form and function will be studied across a broad range of functional categories such as temporality perspective connectivity and narrative coherence Moreover a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross linguistic comparison The analysis of learner data in various cross linguistic settings may thus offer new information on the role of the structural properties of unrelated languages on the process of narrative acquisition In the present volume an attempt is also made to find out how transfer from one language to the other is facilitated Finally the effects of input on narrative

construction in children s first and second language are examined in several studies *Linguistics and Language Behavior Abstracts* ,2006-10
