aspect of culture and the food and cuisine of any region can provide rich insights into the local lifestyle and traditions. Gastronomic tourism therefore involves visiting food producers, restaurants, food festivals or other establishments where visitors can dine and experience the typical products of a region. It is an enjoyable way for tourists to discover the cultural heritage of the places they visit and culinary pleasure is becoming an increasingly decisive factor when choosing a travel destination. In certain regions, gastronomy has been recognised as an Intangible Cultural Heritage by UNESCO and the promotion of local traditional cuisine can be a way to rediscover and preserve local or regional values through culinary riches. Gastronomic tourism is also a factor of economic improvement for different destinations, particularly in developing countries. This book emphasises the importance of many related factors in gastronomic tourism, which often focuses exclusively on food and cooking rather than the whole experience. The book therefore also focuses on culture, commitment, passion, learning, emotions and experiences associated with gastronomy and considers how gastronomic tourism can contribute to achieving Sustainable Development Goals.

**Sustainable Culinary Systems** C. Michael Hall, Gossling Stefan, 2013-01-04. There is increasing public and academic interest in local and sustainable foods and food tourism. These interests have been reflected in such diverse elements as the growth of farmers' markets, green restaurants, food miles, carbon and sustainability labelling, concerns over food supply and security, Slow Food, Fair Trade and a desire to buy and eat locally. Food-related hospitality and tourism is integral to this process because of the way in which it simultaneously acts to globalise and localise food consumption and create new foodways and commodity chains. This book therefore aims to provide an integrated understanding of the contemporary interest in food and food tourism through the use of an international collection of illustrative case study chapters, as well as the provision of a novel integrative framework for the book: a sustainable culinary system. This is the first volume to examine the concept of sustainable culinary systems, particularly with specific reference to tourism and hospitality. Divided into two parts, firstly the notion of the local is explored, reflecting the increased interest in the championing of local food production and consumption. Secondly, treatment of sustainability in food and food tourism and hospitality in settings that reach beyond the local in a business and socio-economic sense is reviewed. The book therefore reflects much of the contemporary public interest in the conscious or ethical consumption and production of food, as well as revealing the inherent tensions between local and broader goals in both defining and achieving sustainable culinary systems and the environmental, social and economic implications of food production and consumption. This book provides the reader with an integrated approach to understanding the subject of how culinary systems may be made more sustainable and will be valuable reading to all those interested in sustainable food and food tourism.

**Heritage Cuisines** Dallen J. Timothy, 2015-11-19. Food is one of the most fundamental elements of culture and a significant marker of regional and ethnic identity. It encompasses many other elements of cultural heritage beyond the physical ingredients required for its production. These include folklore, religion, language, familial bonds, social structures, environmental determinism, celebrations and

ceremonies landscapes culinary routes smells and tastes to name but a few However despite all that is known about foodways and cuisine from hospitality gastronomical supply chain and agricultural perspectives there still remains a dearth of consolidated research on the wide diversity of food and its heritage attributes and contexts This edited volume aims to fill this void by consolidating into a single volume what is known about cuisines and foodways from a heritage perspective and to examine and challenge the existing paradigms concepts and practices related to gastronomic practices intergenerational traditions sustainable agriculture indigenous rituals immigrant stories and many more heritage elements as they pertain to comestible cuisines and practices The book takes a global and thematic approach in examining heritage cuisines from a wide range of perspectives including agriculture hunting and gathering migration ethnic identity and place nationalism sustainability colonialism food diversity religion place making festivals and contemporary movements and trends All chapters are rich in empirical examples but steady and sound in conceptual depth This book offers new insight and understanding of the heritage implications of cuisines and foodways The multidisciplinary nature of the content will appeal to a broad academic audience in the fields of tourism gastronomy geography cultural studies anthropology and sociology

**Food, Gastronomy and Tourism** F. Xavier Medina, Jordi Tresserras, 2018 *Food Tourism and Regional Development* C. Michael Hall, Stefan Gössling, 2016-05-26 Food tourism is a topic of increasing importance for many destinations Seen as a means to potentially attract tourists and differentiate destinations and attractions by means of the association with particular products and cuisines food is also regarded as an opportunity to generate added value from tourism through local agricultural systems and supply chains and the local food system From a regional development perspective this book goes beyond culinary tourism to also look at some of the ways in which the interrelationships between food and tourism contribute to the economic environmental and social wellbeing of destinations communities and producers It examines the way in which tourism and food can mutually add value for each other from the fork to the plate and beyond Looking at products e g cheese craft beer noodles wine attractions restaurants and events and diverse regional examples e g Champagne Hong Kong Jamaica Margaret River southern Sweden and Tuscany the title highlights how clustering networking and the cultural economy of food and tourism and foodscapes adds value for regions Despite the attention given to food wine and culinary tourism no book has previously directly focused on the contribution of food and tourism in regional development This international collection has contributors and examples from almost every continent and provides a comprehensive account of the various intersections between food tourism and regional development This timely and significant volume will inform future food and tourism development as well as regional development more widely and will be valuable reading for a range of disciplines including tourism development studies food and culinary studies regional studies geography and environmental studies
