## **Cultural Methodologies:**

**Cultural Methodologies** Jim McGuigan,1997-11-21 Cultural Methodologies illustrates the distinctiveness and coherence of cultural studies as a site of interaction between the humanities and the social sciences Topics covered include the relationship between critical theory and cultural studies the pragmatics of cultural research and education ethical questions and research purposes the role of feminism in cultural studies the uses of autobiography the analysis of city cultures textual analysis and ethnographic procedures constructions of identity in relation to race sexuality and nationhood the use of qualitative and quantitative data and some of the main issues involved in generating research findings for a thesis or other publication The book is written for students either commencing or intending to do research in cultural studies It stresses how necessary it is to consider and plan very carefully the rationales and principles in research while avoiding the straitjacket of methodolatory

**Cultural Methodologies** Jim McGuigan,1997 Cultural Methodologies is the first book to bring together the wide range of approaches which characterise research in cultural studies The topics discussed include the use of qualitative and quantitative data and the role of feminism in cultural studies

**Effectiveness of Cross-Cultural Training Methodology in Chinese Corporate Context** Diana Rees,2013-07-29 Document from the year 2012 in the subject Economics International Economic Relations grade 1 3 Humboldt University of Berlin language English abstract The number of Western expatriates in China is growing however the rate of expatriate failure remains very high Many multinational enterprises are now providing their expatriates with cross cultural training CCT which many studies suggest is an effective way to improve expatriates intercultural competence and their work performance overseas This study attempts to develop an optimal methodology for CCT in China based on review of the literature and empirical data of five semi structured interviews A seven step model is developed and each step is examined for its effectiveness and applicability in a Chinese context Ultimately the final model is presented in the Research Summary and its implications are discussed in detail

**Culturally Responsive Methodologies** Mere Berryman,Suzanne SooHoo,Ann Nevin,2013-01-17 This book offers new methodologies that require the researcher to develop relationships that may enable them to intimately come to respect and know the Other with whom they seek to study

**Cultural Methods in Psychology** Kate C. McLean,2022 As I sat down to write this chapter about the use of life story methods for capturing cultural historical aspects of LGBTQ identity development I was transported back in time It was a hot summer day in 2004 I had travelled back from the big city where I was attending university to visit my family This was my first summer away from home At that moment my family and I sat in the parking lot of a diner having just finished breakfast at a local greasy spoon a ritualistic send off before I started my four hour return drive In those moments our car felt unusually cramped My dad was in the back seat with me my mom and brother in the front I didn t have much of an appetite

that morning knowing that in mere minutes I would come out to my family as gay On our way out of the restaurant walking to our separate cars I somehow managed to muster up the courage to tell my family there was something important I wanted them to know So there I was in the backseat of the car with a message for my family Looking back on it the message was more like an ultimatum They could learn to love this new version of me as I had done or our routine see you later might be a goodbye This is the beginning of my story both my coming out story and in some ways my life story Thankfully my family is still an important part of this story

**Research Methods for Cultural Studies** Michael Pickering, 2008-02-22 This new textbook addresses the neglect of practical research methods in cultural studies It provides readers with clearly written overviews of research methods in cultural studies along with guidelines on how to put these methods into operation It advocates a multi method approach with students drawing from a pool of techniques and approaches suitable for their own topics of investigation The book covers the following main areas Drawing on experience and studying how narratives make sense of experience Investigating production processes in the cultural industries and the consumption and assimilation of cultural products by audiences and fans Taking both quantitative and qualitative approaches to the study of cultural life Analysing visual images and both spoken and written forms of discourse Exploring cultural memory and historical representation

*Cultural Studies Methodology and Political Strategy* Robert F. Carley, 2021-04-28 This book is an intervention into cultural studies theoretical and methodological foundations It addresses a crisis in conjunctural analysis that there is no theorized method for conjunctural analysis as it pertains to recognizing a conjunctural shift or the emergence of an organic crisis This crisis is connected to the belief that the definition of the conjuncture is ambiguous in Gramsci's work but using a broader range of primary secondary and also untranslated sources on the conjuncture Carley demonstrates that Gramsci has decisively settled that ambiguity Through a philological approach to Gramsci's original texts this book alters the debate around conjunctural analysis and offers means to reinterpret cultural studies and its relationship to its founding thinkers

**Monitoring Genetically Manipulated Microorganisms in the Environment** Clive Edwards, 1993-03-22 Monitoring Genetically Manipulated Microorganisms in the Environment Clive Edwards Department of Genetics and Microbiology University of Liverpool UK Genetically manipulated microorganisms GEMs have been proposed for a variety of applications that would involve their release into open environments that already harbour a diverse and often highly active microflora This proposal is controversial especially in view of the problems in studying the fate and survival of GEMs in natural ecosystems This book describes methods for the detection of target organisms in heterogeneous populations The tendency of some species to adopt viable but non culturable states is addressed Molecular genetic methods that have the potential to overcome this problem are presented These are also illustrated by their application as detection methods in aquatic environments Terrestrial habitats are discussed using a description of a contained microcosm for release and recovery of genetically modified Gram positive bacteria Detailed methods for the quantitative extraction of microorganisms from soil are reviewed along with an overview of experimental systems that have attempted to define the fate of GEMs in soil as well as to assess gene transfer events The final chapter deals with models that describe microbial interactions in the environment Although the chapters in this book are principally aimed at those working with genetically manipulated microorganisms there is no doubt that much of what is discussed is equally applicable to increasing our understanding of microbial ecology in general      *BAR International Series*, 1978      *Understanding and Evaluating Methodologies* Nimal Jayaratna, 1994 Since the 1970s information system methodologies have proliferated rapidly causing difficulties for those needing to select an appropriate methodology This text provides a comparison study of methodologies by developing and

using a conceptual framework After discussing the wider information systems context and establishing and applying the framework to ethics soft and structured methodologies the author presents four research case studies and discusses the lessons that these provide The work concludes with recommendations and guidelines for practical use
