

Chibber, V. (2022). *Class Matrix: Social Theory after the Cultural Turn*. Harvard University Press.

Review by Michael Beyea Reagan

In his new book, *The Class Matrix: Social Theory after the Cultural Turn*, Marxist scholar and activist Vivek Chibber seeks to further explore the promise of Marx's materialism. Part defense of materialism, part modification to address the critiques of the 'cultural turn,' Chibber gives us a strong case for the power of materialist theory. However, in the final analysis Chibber's version of materialism is too closely hewn to unreconstructed Marxism, leaving many of the problems and questions present in materialist thought unaddressed. Since Marx we've had more than a hundred years of scholarship that sought to build from the materialist foundation in a meaningful way, taking its contributions and moving beyond its limitations. And even a quick look at history tells us that material class analysis is important, but ultimately constitutes only part of a compelling social theory.

At its strongest, the book demonstrates the continuing power of materialism. In five chapters Chibber shows how class structure relates to the process of class formation, a contingent and elusive phenomenon of workers coming to class consciousness and collective political action. Class formation, he tells us, doesn't necessarily lead to resistance. Instead, it is dependent on questions of consent and what he calls 'resignation,' a position by which the working class makes individual decisions to accommodate the system, rather than challenge it headlong. This process contributes to social stability and is a materialist explanation for why we haven't seen the types of collective revolutions predicted in Marx. Using game theory, Chibber says the economic structure produces resignation, a rational response to a constrained set of conditions. He then weaves together the relationship between structure and agency in a way that allows explanatory power for both, before concluding with an analysis of how his 'class matrix' framework can help us understand the current political economy.

Chibber's big contention is that class is special. "The peculiarity of class," he writes, "resides in that fact that it is the only social relation that directly governs the material well-being of its participants"(p. 17). This fixed materiality places peoples' "meaning orientation" as "causally dependent" on their structural location in the class system. Culture, for all its independent variability, Chibber says, is ultimately rooted in one's class position, and class at its base is unique from other forms of social formation in that it is material. Important for him is that a "causal arrow thus runs *from* the class structure to the meaning orientation of its actors"(p. 17). Infrequently this will lead to collective action of resistance, Chibber says, as workers seek individual solutions to class problems, try to overcome free-rider issues of collective action, and only rarely may seek to contribute to Marx's 'class for itself' conception of collective political struggle against all these obstacles. This is the foundation upon which the 'class matrix' operates. Class formation is far from a determined process, but a highly contingent and even difficult process. As workers "resign"
