Christopher Bates, Ling-li Bates, 2005      Culture Shock! Kay Jones, 2005      **Serving Library Users from Asia** John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US While books on

serving other target groups in libraries have been published e.g. disabled Latino seniors etc. few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries, cultures of East, Southeast and South Asia, with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library, providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public, school, and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described, literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

*Effectiveness of Cross-Cultural Training Methodology in Chinese Corporate Context* Diana Rees, 2013-07-29. Document from the year 2012 in the subject Economics International Economic Relations, grade 1-3, Humboldt University of Berlin, language English, abstract. The number of Western expatriates in China is growing, however, the rate of expatriate failure remains very high. Many multinational enterprises are now providing their expatriates with cross-cultural training (CCT), which many studies suggest is an effective way to improve expatriates' intercultural competence and their work performance overseas. This study attempts to develop an optimal methodology for CCT in China based on review of the literature and empirical data of five semi-structured interviews. A seven-step model is developed, and each step is examined for its effectiveness and applicability in a Chinese context. Ultimately, the final model is presented in the Research Summary, and its implications are discussed in detail.
