Culture Shock Among Iranian Students in the United States Rahmatulla Fouladinashta,1980 **Iran** Vijeya Rajendra,Gisela T. Kaplan,Rudi Rajendra,2004 Explores the geography history government economy people and culture of Iran *Applied Cultural Linguistics* Farzad Sharifian,Gary B. Palmer,2007-04-11 Research in the relatively new field of cultural linguistics has implications for second language learning and intercultural communication This volume is the first of its kind to bring together studies that examine the implications for applied programs of research in these domains Collectively the contributions explore the interrelationship between language culture and conceptualisations Each study focuses on a different language and culture The languages cultures studied include Japanese Chinese Arabic Persian English Aboriginal English and African English The particular conceptual bases of the contributions range from theories of embodiment and conceptual metaphors to theories of schemas and cultural scripts Several authors directly address the application of their observations to the fields of second language dialect learning and intercultural communication while others first present a theoretical analysis and then explore its practical implications Collectively the contributions establish a novel direction for research in applied linguistics *Working Across Cultures* John Hooker,2003 A guide to adapting and thriving within unfamiliar cultural settings challenges the notion that professional life interacts with culture only at the etiquette level distinguishing between rule based and relationship based cultures while considering the roles of such factors as competition security and lifestyle Social Science *Advances in Cultural Linguistics* Farzad Sharifian,2017-05-02 This groundbreaking collection represents the broad scope of cutting edge research in Cultural Linguistics a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life from emotion and embodiment to kinship religion marriage and politics even the understanding of life and death Cultural Linguistics draws on cognitive science complexity science and distributed cognition among other disciplines to strengthen its theoretical and analytical base The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains including World Englishes cross cultural intercultural pragmatics intercultural communication Teaching English as an International Language TEIL and political discourse analysis *Cultural Conceptualisations and Language* Farzad Sharifian,2011 Presents a multidisciplinary theoretical model of cultural

conceptualisations and language which draws on analytical tools and theoretical advancements in several disciplines including cognitive linguistics cognitive anthropology anthropological linguistics distributed cognition complexity science and cognitive psychology

Culture, Body, and Language Farzad Sharifian, René Dirven, Ning Yu, Susanne Niemeier, 2008-11-03 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the mind and more particularly the intertwining of body and mind which has come to be known as embodiment Several books and volumes have explored this theme in length However the interaction between culture body and language has not received the due attention that it deserves Naturally any serious exploration of the interface between body language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings thinking and other experiences in relation to body and language A well established notion that appears to be promising in this direction is that of cultural models constituting the building blocks of a group's cultural cognition The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages The general aim of this venture is to explore the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and or workings of the mind and b the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems such as ethnomedical and religious traditions Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind body and language such as that of Descartes

Hassan,2005 Iran Harsh Arm of Islam sets out to bulldoze what it considers the most far reaching and distractive of all travesty created by men It is not my intention to trash Islam but to demonstrate that Shiite belief is irrational to nauseating heights If world Shiite wishes to continue believing in deceptive teachings of Iran s Shiite ayatollahs after reading this book that is their privilege however they will find it difficult to convince their children that the Shiite Islam is a religion to follow Iran Harsh Arm of Islam offers an unvarnished portrait of the Shiite religion the past Shiite imams including Imam Khomeini and the struggle of Iranians fighting a conspiracy in the name of religion Iran Harsh Arm of Islam is not just another hysterical anti Islam polemic but a forensic peep into the guts of Islam written by an intelligent angry and compelling Muslim critics intimately involve with current events This lively and compelling book is a product of nearly a decade of research and reflection on the relation and the polarization between secular minded Iranians and the Arab Iranian clergy It shows the lack of patriotism toward Iran and the Islamic institution s loyalty to the sands of Arabia The book s balance critique and recommendations are credible and deserve serious considerations Among much suggestion for change is for Iranians to shun the Arab ethos The Arab Islam and the Arab Allah The seven century Arab Allah that Arabs brought into Persia was created in their own image helplessly incompetent and supremely ignorant The ayatollah s of antiquity attributed superlative culture specific human words to their Allah Their Allah is accorded the epithets of allinfinite all compassion all merciful all powerful all knowing and all seeing As some Iranians would say they put watermelons under Allah s armpit to puff up his chest It was also a smart way to promote the class and status of mullahs in the Iranian society In assigning all power to Allah and to themselves the prerogative to carry out that power they have obtained a free hand Iranians should do away with the morbid Arab months in the Arabic

calendar especially the months of Moharram and Safar At the same time they should throw out the Arab Allah and embrace their own God The Persian God of pre Arab Islam who championed love Compassion wisdom and tolerance for all people and all religions By doing away with Arab Allah Shiite clergies can no longer bequeath each other honorific titles by adding the word Allah to nouns to give definite and specific connotation to Arab Allah such as Ayat Allah Allah s miraculous sign Ruh Allah Allah s spirit Hojat Allah Allah s proof to exert their influence over Iranians Iranians will be able to study and choose any religion without fearing the firing squads Also Iranians should convert thousands of useless mosques that are centers for prevention of knowledge with much needed libraries computer Art social activities and learning centers Perhaps in the past the world has not been conscious of one of the most dangerous place the triangle of Terror Qom Iran Karbala Najaf Iraq its complicity its perverse brand of theology its zealous opposition to western democracy or at best saw it as a rather more distance peril but from this day on the world must be on alert and worry
