**Memorandum on Balance of Payments and Foreign Trade Balances 1910-1924** League of Nations,1929

The Significance of the Current Account Mr.Lazaros E. Molho,1990-04-01 This paper reassesses the significance of persistent current imbalances as they become easier to finance in the process of European integration After highlighting some limitations of simple saving investment guidelines for policies toward the current account the paper shows that an economy s current account position may be an indicator of its attitude toward risk Externalities in the incidence of risk could warrant government concern over current imbalances even if they are caused by privately motivated investment and saving decisions Such externalities may arise from credit markets conventional perceptions about country risk and from existing deposit insurance arrangements

Dictionary of Contemporary Chinese Economics Hong Yinxing,2025-05-26

This Dictionary provides the theoretical summary and conceptual framework around the milestones obtained through Chinese reform and development and highlights the research achievements of Chinese economics over the past 40 years. It also presents Chinese economics to the world featuring the Belt and Road Initiative and the Chinese theory and Chinese system to be known and shared internationally with a Chinese intellectual foundation. It sets out to frame the theoretical achievements of extraction and summary of practice experience from Chinese reform and development. The choice of entries in the Dictionary seeks to embody the very Chinese characteristics of economics and the combination of theory and practice is illuminated. Furthermore, the dictionary explores examples of scientific achievements that traditional economics has brought forward and how they fit and unify within both a Chinese as well as an international context.

**Series of League of Nations Publications**, 1930. *Monetary Policy in Transition* Olivier Basdevant, 2005. Monetary policy faces a particularly difficult task in most economies going through structural reforms, having to stabilise fluctuations around the trend. Central banks have also to deal with a trend that is itself subjected to shifts as a result of reforms. This book proposes some perspectives on these issues with various contributions from both practitioners and academics, emphasising how rather simple techniques can be conveniently used to solve complex problems. Several issues are hence considered, each emphasising a particular aspect of the theme proposed:

- i forecasting inflation with the experience of the Reserve Bank of New Zealand being taken as an example since this country went through drastic structural change;
- ii understanding underlying trends of inflation focusing on expectations and data revision wage bargaining process and more generally supply effects since structural change magnifies them;
- iii formulating policy recommendations; the example taken is the strategy towards the euro for Eastern European countries; and
- iv assessing risks of sudden stops.
