Current Concerns In Occupational Stress:

Current Concerns in Occupational Stress Cary L. Cooper, 1980 *Occupational Stress* Rick Crandall, Pamela L. Perrewe, 2020-10-28 Bringing together renowned scholars this handbook contains innovative current empirical and theoretical research in the area of job stress The workplace is one of the major sources of stress in an individual's life Placing this important topic in the context of a transactional process this work is intended to be of use to practitioners working in clinical organisational family and health psychology mental health substance abuse the military and with families and women Chapters are arranged in five parts the first considering theoretical approaches with an introductory article by Professor Emeritus Richard S Lazarus Next is an examination of various model testing formats followed by a section on occupational stress research and coping mechanisms Fourth is a collection of articles on the subject of burnout and the book closes with two distinct interventions directed at stress reduction **Managerial, Occupational and Organizational Stress**

Research 0 Manchester School of Managements, 2024-11-01 This title was first published in 2001 A discussion of managerial occupational and organizational stress research The volume is in seven parts The first part explores the theoretical or conceptual frameworks in occupational and organizational stress that have developed out of empirical work and work with others in different countries The second part provides the reader with reviews of literature on different topics in the field of workplace stress Part Three highlights a range of studies undertaken by UMIST and their collaborating colleagues in different institutions The research that highlights issues and problems of current relevance is found in the fourth part while the methodological studies involving instrument development refining of existing measures and more is found in Part Five The studies linking stress and health follows on from this and the new area of investigation evaluating stress management interventions concludes this survey of research in this field Veterinary Public Health: Veterinary Medicine's Current Challenges in a Globalised World Diana Meemken, Ivan Nastasijevic, Reinhard Fries, Suporn Thongyuan, 2025-03-21 The transfer of zoonotic agents leading to diseases and epidemics is well known as well as the role played by human activity in the transmission of such agents Veterinary Public Health VPH has an essential role keeping transmissible diseases under control and it involves different disciplines and the application of different techniques VPH has generally a local and regional focus in sample collection Disease's detection may be limited to specific areas Despite this aspect of VPH the importance of exchanging data discoveries and information cannot be overlooked due to the everchanging landscape in global trade transboundary diseases and extended animal movements On a local scale VPH needs often to face different challenges starting with the infrastructures for live stocks down to optimization using new technologies as Artificial Intelligence There are instances where veterinary services are not readily available and temporary solutions need to be found as for example paraveterinary services The latter should be guaranteed by adequate professional training along the different stages of as an example the food chain production Given the transboundary nature of zoonotic agents and diseases in the last decades the

One Health approach has emerged as a new and holistic approach to incorporate the different facets of Veterinary Science To strengthen this approach veterinary training should eventually dedicate more attention to public health and to preventive measures of zoonosis and epidemics This renewed focus will also have the additional benefit of defining more clearly the discipline of VPH Human Public Health with the same philosophy should include the animal ecosystem emerging diseases and zoonoses focusing on the Human Animal Interface
