CHAPTER OUTLINE

Introduction: The Anthropological Study of Religion
 Western Perspectives on Religion
 The Development of Anthropological Approaches to Religion
 The Four-Field Approach of Anthropology
 Conclusions: The Biocultural Approach to the Study of Religion

CHAPTER OBJECTIVES

- Describe the development of several Western approaches to studying religion, and show how these ultimately led to the anthropological perspective.
- Introduce the four-field approach of contemporary American anthropology, and demonstrate how each of these fields can contribute to an understanding of religiosity.
- Introduce several core evolutionary principles, and consider how these can help us to comprehend the emergence of religiosity.
- Describe the biocultural approach to the study of religiosity, and demonstrate how using both humanistic and scientific approaches can enable us to more accurately assess the manifestations of religiosity and the role these manifestations play in human life.

A YOUNG MAN TROUBLED BY DISTURBING DREAMS is led out of the village by an old man, who carries a rattle, a drum, and a blanket. They walk for two days and climb to the top of the “spirit” mountain. After spending a night drumming and chanting over the youth, the old man prepares to leave, taking with him all food and water. As he departs, he tells the youth, “When the spirits come for you, you will die. When you come back to life, then you may come back and live with us again.”

...

A monk sits calmly in the street amid the crowds of people and slowly pours a can of gasoline over his head, chanting in a low voice. The crowd parts, leaving

a large circle of empty space around him. The monk then takes a box of matches and lights one as he continues his chanting. As the horrified onlookers watch, he bursts into flames.

...

The small room is filled with worshippers moving to the music played by the band in the front. Suddenly, a man lifts the lid off a box that has been sitting on the floor and removes a rattlesnake from within. Others come over and take snakes from the box as well. Some drink strychnine. Confident that the Holy Ghost will keep them safe, the worshippers hold the snakes in the air and shout “Hallelujah!”

Anthropology And The Study Of Religion:

Anthropological Studies of Religion Brian Morris, 1987-02-27 A lucid outline of explanations of religious phenomena offered by such great thinkers as Hegel Marx and Weber In Search of the Sacred Clinton Bennett, 1996-01-01 This text traces the growth and development of two related disciplines anthropology and the study of religions Locating these disciplines within the intellectual climate of the 19th century the study considers the contributions of scholars such as James George Frazer F Max Muller Emile Durkheim Mary Douglas and Clifford Geertz within an historical framework The author argues that both anthropologists and students of religion have abandoned an objective approach in favour of personal engagement with their subjects replacing observation with conversation monologue with dialogue a text based with people based approach He reveals how each discipline has influenced the other both in terms of methodology and by the provision of data The book also explores the criticism levelled at both disciplines that they have aided colonial domination of the developing world *Anthropology and the Study of Religion* Robert L. Moore, Frank Reynolds, 1984-01-01 **Anthropology of Religion** Kerr Payne, 2017-06 The anthropological study of religion attends to religious life through the study of everyday practices Rather than understanding religion as a set of beliefs anthropologists examine the ways that practices and belief are constitutive of each other via a broad spectrum of representations embodiments and ethical and social practices These everyday practices are constituted by and constituting of many aspects of social life including gender desire performance politics and power Anthropologists thus recognize that religious life is a thoroughly social practice and yet identifiable as transformative and sometimes mysterious subject of investigation Anthropologists of religion are not concerned with discovering the truth or falsehood of religion They are more interested in how religious ideas express a people s cosmology ie notions of how the universe is organised and the role of humans within the world Many study rituals which incorporate symbols and note how these often help to bring communities together in times of crisis or special points in the calendar Anthropology of Religion outlines the scope of the anthropological literature on religion drawing both on classic and more recent studies It supports anthropological approaches to the study of religion from all the subdisciplines cultural anthropology archaeology physical anthropology linguistic anthropology and others In the later twentieth century debate has arisen concerning the scope of the anthropology of religion Do anthropologists of religion only study religions in tribal settings Is it exclusively the study of non Western religions Is it to be limited to the study of religion among oppressed and marginalised people The focus of anthropological study has shifted from the study of tribal to modern religions A number of well received studies have analysed religion in developing societies Europe and the United States A number of promising studies have focused on ritual and ritual forms From this perspective rituals are seen as the fundamental unit of religious expression and the building blocks for all religions This compilation will serve as an excellent tool for scholars practitioners and academics working in the field of migration and religion Selected Readings in the Anthropology of Religion Stephen
