Creative Creatures Willem B. Drees, Ulf Görman, Hubert Meisinger, 2005      *Creative Creatures* Ulf Görman, Willem Drees, Hubert Meisinger, 2005-12-30 This anthology with contributions by leading scholars introduces a new theme into the growing field of science and theology This is the third volume published in association with ESSSAT in the series This volume focuses on two topics that have so far received little attention in the growing field of science and theology i e ethical matters and issues raised by the technological applications of scientific knowledge The book s main themes are technology s impact on our worldview morality nature and culture and morality in a technological society The book is a selection of contributions to the ESSSAT conference in Nijmegen on Values and Ethical Issues in Theology Science and Technology The essays have been selected on the basis of quality and revised in order to create a comprehensive and carefully focused volume      A *Modern Relation of Theology and Science Assisted by Emergence and Kenosis* Bradford McCall, 2018-02-28 How should we attempt to understand the relationship between theology and science in the twenty first century In this book I will attempt to answer this question by examining several previous attempts to classify this relationship I also develop my personal view of the relation thereafter discussing some Catholic contributions to this project and then revisit some of my previously published material highlighting the role of panentheism therein and noting an emergent implication from the literature the resultant possibilities for God an implication that creates space for a broadly relational perspective of the process of emergence These movements allow me to argue that kenosis and emergence can add to the discussion of understanding the theology and science relationship Herein I advocate a monistic process based view of the overlapping relationship between theology and science      **Science, Religion, the Humanities and Hope** Anne Runehov, Michael Fuller, 2024-03-19 This book collects a multidisciplinary range of contributions focusing on the prolific and seminal work of Willem Drees in the fields of philosophy of religion philosophy of the humanities and science and theology religion Trained in both theoretical physics and theology philosophy of religion Drees holds doctoral degrees in both theology and in philosophy and amongst other distinguished positions held professorships at the University of Leiden and at the University of Tilburg Drees was also Editor in Chief of Zygon Journal of Religion Science between 2008 and 2018 and served as President of the European Society for the Study of Science and Theology ESSSAT between 2002 and 2008 In 2018 he was elected as member of the Royal Holland Society of Sciences and Humanities KHMW This contributed volume builds on Drees expansive and provocative scholarly contributions notably around the concept and meaning of naturalism and the humanities to the fields of science and religion as exemplified by his works *Religion Science and Naturalism* 1996 and *What Are the Humanities For* 2021 In a time where more and more young people across the globe are entering higher education such cross disciplinary explorations and re evaluations are vital to the field Accordingly by approaching his work from a variety of disciplines this collection illuminates the broad reach of Drees work and provides scholars from various fields with many new and rich opportunities

avenues for research      **Theology and the Body** Stephen Garner,2011-12-31 The human body is the primary lens through which we view encounter and engage the world around us It is no surprise then to find a wide range of theological reflection upon the human body from those that affirm the human body as something very good through to other more negative views where the body is something to be marginalised or escaped from The body and theology also meet in conversations over body mind and soul gender disability eschatology race and culture sexuality Christology and medicine and technology to name but a few Each of the authors in this volume pick up the theme of embodiment as the lens through which they look at an aspect of theology and body providing an engaging window onto some of these discussions      Human Identity at the Intersection of Science, Technology and Religion
