DeBenedictis, 2011-08-26 Have you ever wondered how the universe originated or whether the universe always existed Have you ever wondered how life began on earth Have you ever heard others discuss origins but felt unable to contribute to the conversation Would you like to defend your views but feel unequipped or inadequate to do so Are you unsure about what to believe Would you like to learn more about the subject of origins If so this book will be a help to you The subject of evolution and creation often causes much contention and controversy The question that may be asked is Why is there so much tension and animosity between those who hold to opposing views regarding the subject of origins Others may ask What do those of opposing views base their beliefs upon Is there any reconciling of the different views The differences I believe in part are due to ones perceptions regarding science and theology This book is not about Christians versus atheists This book is more about creation versus evolution than about Creationism versus Evolutionism This book is about comparing various views opinions and evidence related to evolution and creation Some of the information being presented may be new to you and may take some time to digest Evolutionists generally view creation in the same way that creationists generally view evolution Opposing views are rarely taken seriously as they are a contradiction to ones own bias Whatever your current views are regarding the origins of the universe and life or level of knowledge of origins this book is about considering various sides of the issue of evolution In this book we will be comparing the evidence and arguments and then weighing the pros and cons in an attempt to determine the validity of each view You will however be left to make your own decisions about each subject that is presented This book may either strengthen your current views of origins or may cause you to re think what you currently believe about origins Whatever your views are regarding the origins of the universe and life this book is about considering various sides of the issue of evolution In this book the evidence and arguments will be presented for the reader to determine the validity of each view Subjects such as the origin of the universe the age of the universe the fossil evidence the possibilities of a global flood the origins of life Stanley Millers Experiment of 1953 the fossils in the strata of the earth the components of evolution

The Creation-evolution Controversy R. L. Wysong, 1976 Who has not wondered about the origin of the universe and life And for certain this is a question that should be taken with the utmost seriousness and sense of duty After all how can we know why we are here or what we should be doing if we do not know where we came from Although religions have their belief creation and materialists have their belief evolution beliefs are not what truth is about This is a book of daring adventure between these two emotionally charged belief systems Rather than advocate Dr Wysong pits one belief against the other using the only weapons that should be used if truth is the objective reason and evidence Dr Wysong s rational philosophic and scientific probings make this book a reservoir of thoughtful and factual information that will not draw dust on your bookshelf Now in its thirteenth printing this seminal 1975 book has been read worldwide is widely cited on the web and continues to be used in schools It has helped lay

the groundwork for a rational dialogue between religion and science and remains current to this day because of its even handed treatment of the subject and because reason should never fall out of fashion

The Creation/Evolution Controversy Kary D. Smout, 1998-10-28

This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology
