Carbon Rich Compounds I Armin de Meijere, 2003-09-05 Carbon Rich Compounds are defined here as carbon skeletons with a carbon to hydrogen ratio of 1

Carbon-Rich Compounds Michael M. Haley, Rik R. Tykwinski, 2006-05-12 This is the only up to date book on the market to focus on the synthesis of these compounds in this particularly suitable way A team of excellent international authors guarantees high quality content covering such topics as monodisperse carbon rich oligomers molecular electronic wires polyaromatic hydrocarbons nonconjugated small molecules nanotubes fullerenes polyyynes macrocycles dendrimers phenylenes and diamondoid structures The result is a must have for everyone working in this expanding and interdisciplinary field including organic and polymer chemists materials scientists and chemists working in industry

Carbon and Its Domestication A.M. Mannion, 2006-06-10 Carbon is chemically versatile and is thus the body and soul of biological geological ecological and economic systems Its appropriation by humans through diversion of its biogeochemical cycle has been a mainstay of development This domestication is characterized by a number of thresholds control of fire development of agriculture expansion of Europe fossil fuel use and biotechnology All have exacted an environmental toll not least being climatic change and biodiversity loss Carbon management now and in the future is a hot political issue There is no existing book which focuses on the pivotal role of carbon in the environment and society and the ways in which carbon has been domesticated in time and space to generate wealth and political advantage Students of environmental science geography biology and general science will find this work invaluable as a cross disciplinary text

Carbon Rich Compounds, 1998 **Carbon Rich Compounds**, 1998 **Assessment Methods for Soil Carbon** John M. Kimble, Ronald F. Follett, Bobby A. Stewart, 2000-12-28 Since carbon sequestration in soils reduces the amount of carbon available to the atmosphere the Kyoto Protocols have heightened interest in soil carbon pools and their effect on carbon fluxes Assessment Methods for Soil Carbon addresses many of the questions related to the measurement monitoring and verification of organic and inorganic carbon in soils The major topics covered are carbon pools soil sampling and preparation analytical techniques for soil carbon soil erosion and sedimentation remote sensing GIS and modeling procedures for scaling carbon data from point and local measurements to regional and even national scales and economic and policy issues In Assessment Methods for Soil Carbon leading researchers show that we now have the ability to measure monitor and verify changes to soil carbon The book establishes the need for standardized methods that can be used by anyone and helps us better understand the link between the pedosphere soils and the atmosphere It also shows the importance of developing links between the economics of carbon sequestration and the amounts sequestered and highlights the need for scientists and policy makers to interact to ensure that policies fit within the scope of present technologies
