Cardiac Gap Junctions:

Cardiovascular Gap Junctions Stefan Dhein,2006-01-01 In recent years gap junction research in the cardiovascular system has considerably improved the understanding of cardiac function and the vasculature in health and disease The present book focuses on the communication of intercellular gap junctions in Cardiac Gap Junctions S. Dhein,1998-01-22 The most important communication mechanism between cardiac cells is electrical transmission via low resistance pathways the so called gap junction channels These gap junctions play a vital role in the physiological activation pattern and in pathophysiological cardiac conditions This book provides a comprehensive overview of what is currently known about cardiac gap junctions a relatively young field of research An introduction into the various aspects of activation propagation and coupling in the heart is followed by a detailed description of the structure and diversity of gap junctions including amino acid sequences and species variability Subsequent chapters discuss their distribution physiology and functions and the regulation of expression The author then goes on to put these basic findings into a clinical context The changes of gap junction distribution in the course of cardiac disease and their implications receive special attention A further chapter presents pharmacological approaches to the modulation of gap junction channel conductivity and outlines possible new therapeutic strategies The final part of the book especially written for scientists who intend to enter the field of cardiovascular research describes methods of investigation including double cell voltage clamp immunohistochemistry isolation procedures for gap junctions and dye coupling assays Authoritative and up to date this book successfully bridges the gap between basic and clinical research It provides an excellent introduction for newcomers to the field and will also be a valuable source of information for basic researchers cardiologists physiologists and pharmacologists **Gap Junctions** J.E. Hall,Guido Zampighi,R.M.
