Career Guidance and Counseling Through the Lifespan Edwin L. Herr, Stanley H. Cramer, Spencer G. Niles, 2004
The Sixth Edition of *Career Guidance and Counseling Through the Lifespan* provides comprehensive treatment of career development theory and practice in a world of work undergoing profound change. This book examines the current changes in the organization and content of work, the implications of the global economy for the practice of career development, best practices in career services, and perspectives on the research findings supporting career counseling and other career interventions. Highlights of the Sixth Edition: Provides a historical perspective on the evolution of career counseling and career guidance and identifies how definitions of these processes and the role of counselors change across time; Discusses the applications of systematic and planned approaches to career guidance and counseling for children, youth, and adults in various settings: schools, colleges, and universities; business and industry; and community agencies; Offers superior emphasis on the applications of career counseling and guidance to different and special needs populations, including African Americans, Hispanics, other culturally diverse populations, males, females, children, and adolescents; adults with mental health problems in the workplace; midcareer job changers; the unemployed; dual career families; persons with work-family conflicts; and burned-out workers; Includes expanded treatment of international perspectives on changes in the occupational structure, work, and career interventions; Includes expanded treatment of the school-to-work transition and work-based learning as legislative initiatives and as important factors shaping career-relevant schooling, transition services, and the transition and adjustment to work. Handbook of Career Development Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, A. G. Watts, 2014-02-08
This book is focused on work, occupation, and career development themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development, counseling, and guidance that has developed over the last fifty years reveals that theorizing and model building have been largely dominated by Western epistemologies. Some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing, research, and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader

contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling **Resources in Education** ,1985 **Counseling for Career Development** E. L. Tolbert,1980 **Research in Education** ,1973
