Caring For A Child:

The Caring Child Nancy Eisenberg, 1992 Much of this century's empirical research in the social sciences has been devoted to understanding the causes and contributing factors of antisocial behavior. In studies of children's moral reasoning and conduct, developmental psychologists have probed the cognitive and social bases of aggression, conflict, delinquency, and prejudice. In contrast to psychology's lengthy preoccupation with negative behavior in children, the study of children's altruistic, cooperative, and sharing behavior has a relatively short history. *The Caring Child* provides the most up-to-date account of our current understanding of the motivations behind prosocial behaviors and how these motives develop and are elicited in various situations. When do children first exhibit prosocial behavior, particularly altruism? How do helping, sharing, and comforting behaviors change with age? Why are some children more caring than others? Are differences among children's prosocial behaviors a result of hereditary factors, of how children are raised, or both? Can prosocial tendencies be enhanced by parents and educators? deliberate attempts to instill altruistic motives and to teach caring behaviors? Nancy Eisenberg broadens our concept of the moral potential of children as she shifts the focus from censoring antisocial behaviors to the active promotion of kindness and caring in children.

Caring Thomas D. Yawkey, Kenneth C. Jones, 1982 *A Practical Guide for Raising a Self-Directed and Caring Child* Louis J. Lichtman, 2011-04-29 Countering the Tiger Mother parenting style, this research-based practical guide provides an excellent framework for raising competent and compassionate children. In an era of helicopter parents—moms and dads who constantly hover over their children to monitor and manage their lives—and our culture's focus on personal gain and corporate greed, there is great need for a parenting guide that outlines how to raise children who are well-adjusted. *A Practical Guide for Raising a Self-Directed and Caring Child* fills that void. In response to Amy Chua's recent bestseller *Battle Hymn of the Tiger Mother*, psychologist Louis J. Lichtman, PhD, presents a compelling case for the notion that children will be more successful if they are self-directed rather than parent-controlled. Through anecdotes and research studies, Lichtman illustrates how to build a child's self-esteem and delves into how parenting styles and disciplinary practices influence a child's behavior and character. Lichtman also gives special attention to the topics of achievement parenting during the adolescent years and how family structure impacts children. In addition, Lichtman discusses how to avoid common parenting mistakes, issues to consider before deciding to become a parent, and how to give children the best possible start in life. Designed to help parents develop a set of guiding parenting principles, this guide is applicable to all situations and to children of all ages. *A Practical Guide for Raising a Self-Directed and Caring Child* offers a solid, comprehensive resource for today's parents.
