Capital Culture Jody Berland, Shelley Hornstein, 2000 Berland humanities York U Canada and Hornstein art history York U present 22 contributions that attempt to explore the connections between art and money in a world increasingly dominated by the practices and ideologies of market culture Consisting of both essays and reproductions of art works the contributions come from Canadian artists academics curators and critics Among the topics addressed in the essays are the relationship between nationalism and the value of art a challenge to the universality of aesthetics the erosion of artistic and educational freedoms and cultural policy and funding in Canada Annotation copyrighted by Book News Inc Portland OR **Language, Capital, Culture**, 2007-01-01 Singapore has been taken by many researchers as a fascinating living language policy and planning laboratory Language and education policy in Singapore has been pivotal not only to the establishment and growth of schooling but to the very project of nation building Since their inception mother tongue policies have been established with two explicit goals Firstly there is the development and training of human and intellectual capital for the expansion and networking of a Singaporean service and information economy Secondly there is the maintenance of cultural heritage and values as a means for social cohesion and indeed the maintenance of community and regional social capital These tasks have been fraught with tension and contradiction both in relation to the conditions of rapid cultural economic and political change in Asia and globally but as well because of the tensions between the so called world language English and Singapore's three other official languages Tamil Malay and Mandarin This has been complicated of course by the challenges of vibrant regional dialects and the emergence of Singlish as a powerful medium of community life *Capital Culture* Linda McDowell, 1997-12-16 The changing nature of waged work in contemporary advanced industrial nations is one of the most significant aspects of political and economic debate It is also the subject of intense debate among observers of gender Capital Culture explores these changes focusing particularly on the gender relations between the men and women who work in the financial services sector The multiple ways in which masculinities and femininities are constructed is revealed through the analysis of interviews with dealers traders analysts and corporate financiers Drawing on a range of disciplinary approaches the various ways in which gender segregation is established and maintained is explored In fascinating detail the everyday experiences of men and women working in a range of jobs and in different spaces from the dealing rooms to the boardrooms are examined This volume is unique in focusing on men as well as women showing that for men too there are multiple ways of doing gender at work English Compound Words and Phrases.
