Nelson,2024-01-02 The second volume of an ambitious new economic history of American higher education Capital of Mind is the second volume in a breathtakingly ambitious new economic history of American higher education Picking up from the first volume Exchange of Ideas Adam R Nelson looks at the early decades of the nineteenth century explaining how the idea of the modern university arose from a set of institutional and ideological reforms designed to foster the mass production and mass consumption of knowledge This industrialization of ideas mirrored the industrialization of the American economy and catered to the demands of a new industrial middle class for practical and professional education From Harvard in the north to the University of Virginia in the south new experiments with the idea of a university elicited intense debate about the role of scholarship in national development and international competition and whether higher education should be supported by public funds especially in periods of fiscal austerity The history of capitalism and the history of the university Nelson reveals are intimately intertwined which raises a host of important questions that remain salient today How do we understand knowledge and education as commercial goods Should they be public or private Who should pay for them And fundamentally what is the optimal system of higher education for a capitalist democracy The Mystery of Capital Hernando De Soto,2007-03-20 A renowned economist argues for the importance of property rights in the most intelligent book yet written about the current challenge of establishing capitalism in the developing world Economist The hour of capitalism s greatest

triumph writes Hernando de Soto is in the eyes of four fifths of humanity its hour of crisis In *The Mystery of Capital* the world famous Peruvian economist takes up one of the most pressing questions the world faces today Why do some countries succeed at capitalism while others fail In strong opposition to the popular view that success is determined by cultural differences de Soto finds that it actually has everything to do with the legal structure of property and property rights Every developed nation in the world at one time went through the transformation from predominantly extralegal property arrangements such as squatting on large estates to a formal unified legal property system In the West we've forgotten that creating this system is what allowed people everywhere to leverage property into wealth This persuasive book revolutionized our understanding of capital and points the way to a major transformation of the world economy Catechism of Karl Marx's "Capital" Lewis Cass Fry,1905 *Journals of the House of Commons of the Dominion of Canada* Canada.
