Capitalism And Citizenship The Impossible Partnership:

Capitalism and Citizenship Kathryn Dean,2012-11-12 Can capitalism and citizenship co exist In recent years advocates of the Third Way have championed the idea of public spirited capitalism as the antidote to the many problems confronting the modern world This book develops a multi disciplinary theory of citizenship exploring the human abilities needed for its practice It then argues that capitalism impedes the nurturing of these abilities In advancing these arguments Kathryn Dean draws on the work of a wide range of thinkers including Freud Marx Lacan Habermas and Castells **Reclaiming**

Constitutionalism Maria Tzanakopoulou,2018-02-22 Reclaiming Constitutionalism articulates an argument for why the constitutional phenomenon remains attached to the state despite the recent advent of theories of global constitutionalism Drawing from the idea that constitutionalism historically sought to build social consensus this book argues that the primary aim of constitutionalism is to create social peace and to shield rather than to limit the power of political elites in any given state Implicit in the effort to preserve social peace is the fundamentally important acknowledgement of social conflict Constitutionalism seeks to offer a balance between opposing social forces However this balancing process can sometimes ignite rather than appease social conflict Constitutionalism may thus further a project of social struggles and emancipation for it incorporates within its very nucleus the potential for an agonistic version of democracy In light of the connection between social conflict and constitutionalism this book explores the conditions for and locations of the former From the state and the EU to the global level it considers the role of citizenship national identities democracy power and ideology in order to conclude that the state is the only site that satisfies the prerequisites for social conflict Reclaiming constitutionalism means building a discourse that opens up an emancipatory potential a potential that under current conditions cannot be fulfilled beyond the borders of the state Social Insurance and Social Justice Leah Rogne,Carroll Estes,Brian Grossman,Brooke

Citizenship Richard Yarwood, 2013-12-17 The idea of citizenship is widely used in daily life Citizenship tests are used to determine who can inhabit a country citizen charters have been used to prescribe levels of service provision citizens juries are used in planning or policy enquiries citizenship lessons are taught in schools youth organisations attempt often aim to instil good citizenship active citizens are encouraged to contribute voluntary effort to their local communities and campaigners may use citizens rights to achieve their goals What is meant by citizenship is never static and the subject of debate by academics politicians and activists These ideas are manifest and contested at a range of different scales This book therefore argues geography is crucial to understanding citizenship The text is organised around a number of spatial themes to examine how spatialities of citizenship are played out at a range of scales Ideas about locality boundaries mobility networks rurality and globalisation are used to reveal the importance of space and place in the constitution contestation and performance of citizenship In doing so the book reveals how different ideas of citizenship can include or exclude people from society and space Consideration is given to ways in which different groups have sought to empower themselves through various actions associated with and beyond conventional notions of citizenship Written in an accessible way with detailed case studies to illustrate conceptual ideas and approaches this book offers social scientists new spatial perspectives on citizenship while also bridging together strands of social cultural and political geography in ways that deepen understandings of people and place

Sharing Economies in Times of Crisis
Anthony Ince, Sarah Marie Hall, 2017-09-05 The new sharing economy is a growing phenomenon across the Global North It claims to transform relationships of production and consumption in a way that can improve our lives reduce environmental impacts and reduce the cost of living Amidst various economic environmental and other crises this message has strong

resonance Yet it is not without controversy and there have been heated debates over negative dimensions for workers and consumers alike This book stretches far beyond the sharing economy as it is popularly defined and explores the complex intersections of sharing and the economy and how a better understanding of these relationships might help us address the multiple crises that confront contemporary societies The contributors to this book explore a wide diversity of sharing systems and practices from various empirical case studies ranging from hospitality to seed swapping and from indigenous land rights to alcohol consumption In each chapter a different crisis or vulnerability frames and shapes the study allowing contributors to unpick the ways in which crisis and sharing relate to each other in real life The book is divided into three thematic sections Following an extended introduction to the themes and ideas of the book by the editors the first section foregrounds the shaping of sharing practices by already existing or anticipated crises The second section focuses on the lived relations between sharing and economic practice In the third section authors conclude the book by exploring the possibilities and challenges for creating alternative economic forms grounded in practices of sharing This edited volume makes a major original contribution towards academic understandings of sharing economies in the context of crises It is suitable for both students and academics who are interested in political economy economic geography and consumption
