Leisure in Britain, 1780-1939 John K. Walton, James Walvin, 1983 **Children, Cinema and Censorship** Sarah Smith, 2005-06-22 Children have long been one of cinema's largest audiences yet from its infancy cinema has in the minds of moral watchdogs accompanied a succession of pastimes and new technologies as catalysts for juvenile delinquency From penny dreadfuls and comic books to television video nasties and computer games and more recently gangsta rap mobile phones and the Internet all have been seen as threats to children's safety health morality and literacy and cinema is no exception Writing with energy and wit and mobilising impressive original research Sarah J Smith explores recurring debates in Britain and America about children and how they use and respond to the media focusing on a key example the controversy and apparent moral panic surrounding children and cinema in its heyday the 1930s She shows how children colonised the cinema and established their own distinct cinema culture And considering films from Snow White and the Seven Dwarfs to Scarface and King Kong she explores attempts to control children's viewing the underlying ideas that supported these approaches and the extent to which they were successful Revealing the ways in which children subverted or circumvented official censorship including the Hays Code and the British Board of Film Censors she develops a challenging new proposition that children were agents in the regulation of their own viewing not simply passive consumers *To-day's Cinema News and Property Gazette*, 1913 **Celebrating 1895** John Fullerton, 1998 Includes 27 of the finest papers presented at The Centenary of Cinema conference in June 1995 **Odeon Cinemas** Allen Eyles, 2002 The old saying does often seem to hold true the rich get richer while the poor get poorer creating a widening gap between those who have more and those who have less The sociologist Robert K Merton called this phenomenon the Matthew effect named after a passage in the gospel of Matthew Yet the more closely we examine the sociological effects of this principle the more complicated the idea becomes Initial advantage doesn't always lead to further advantage and disadvantage doesn't necessarily translate into failure Does this theory need to be revisited Merton's arguments have significant implications for our conceptions of equality and justice and they challenge our beliefs about culture education and public policy His hypothesis has been examined across a variety of social arenas including science technology politics and schooling to see if in fact advantage begets further advantage Daniel Rigney is the first to evaluate Merton's theory of cumulative advantage extensively considering both the conditions that uphold the Matthew effect and the circumstances that cause it to fail He explores whether growing inequality is beyond human control or disparity is socially constructed and subject to change Reexamining our core assumptions about society Rigney causes us to rethink the sources of inequity *The Film Renter and Moving Picture News*, 1927 *The P.R. Gazette* ... , 1925 **Cinemas in Britain** Richard Gray, 1996 To celebrate 100 years of the cinema in Britain this book looks at the history of cinema building from the nineteenth century to the present day Through a detailed architectural history it also evokes the magic of movie going **British Builder**, 1923 **Cinemas of the World** James Chapman, 2004-07-04 The

cinema has been the pre eminent popular art form of the 20th century In *Cinemas of the World* James Chapman examines the relationship between film and society in the modern world film as entertainment medium film as a reflection of national cultures and preoccupations film as an instrument of propaganda He also explores two interrelated issues that have recurred throughout the history of cinema the economic and cultural hegemony of Hollywood on the one hand and on the other the attempts of film makers elsewhere to establish indigenous national cinemas drawing on their own cultures and societies Chapman examines the rise to dominance of Hollywood cinema in the silent and early sound periods He discusses the characteristic themes of American movies from the Depression to the end of the Cold War especially those found in the western and film noir genres that are often used as vehicles for exploring issues central to us society and politics He looks at national cinemas in various European countries in the period between the end of the First World War and the end of the Second which all exhibit the formal and aesthetic properties of modernism The emergence of the so called new cinemas of Europe and the wider world since 1960 are also explored Chapman is a tough thinking original writer an engaging excellent piece of work David Lancaster *Film and History* Motion Picture Almanac ,2005 The Cinema; Its Present Position and Future Possibilities National Council of Public Morals.
