*The Birth of the Sun God* A C Farjani,2024-05-23 An introduction to astrotheology an ancient science that is almost completely forgotten today This first volume provides an astronomical interpretation of the birth of Jesus Each event each character location or any data is converted into astronomical data associating these elements with celestial bodies This book written in simple colloquial language containing celestial maps and beautiful images of religious iconography will open up a new perspective for the reader to understand the ancient mythical religious narratives The adventure of identifying step by step each place or character in the Gospels with stars and constellations is riveting It makes us want to know more and more as the author continues his revelations The astronomical interpretation of Gentile da Fabriano s painting is astonishing Ultimately the suggestions for creating an astronomically correct nativity scene bring us an inspiring experience *Ancient Sun God* Hilton Hotema,1996-09 1956 Contents the Ancient Light the Great Sun Secret of the Stars Astology Changed to Astronomy Virgin Mother Majesty of God s Kingdom the Sovereign Sun Ab Ram the Sun God Christian Sun God Lamb of God Perfection The Westminster Review ,1901 Secret of Regeneration Hilton Hotema,1998 **Proceedings of the Society of Biblical Archaeology** Society of Biblical Archæology (London, England),1918 Journal of the Asiatic Society of Bombay Asiatic Society of Bombay,1914 Vol 1 new ser v 7 include the society s Proceedings for 1841 1929 title varies Dead Sea Scrolls and the Life of the Ancient Essene Raymond W. **Evolution and creation (Illustrations)** Herbert Junius Hardwicke,2015-06-24 MAN WHENCE AND WHITHER The fables of the creation of nature and man by various fantastic and ridiculous means which have for thousands of years found favour with the unthinking multitudes inhabiting the earth and which even now are one or other firmly believed by the large majority of both the Eastern and Western populations must ere long gradually give way to the truer and grander theory of Evolution resulting from the study of the natural sciences Priests monks and other interested people backed up by the enormous wealth which has accumulated to the various religious creeds during the past centuries of darkness ignorance and gross credulity will no doubt oppose all their tremendous forces against the new philosophy thus for a while delaying the inevitable result But this condition of things cannot last long Education is doing and will continue to do its work until at length falsehood and slavery will give place to truth and liberty In order to discover the origin of man it is necessary to carry the mind back to a very remote period and observe the mode of development of our planetary system for according to the theory of Evolution there were no starting points for particular forms in nature the whole universe consisting of one

continuous unfolding of phenomena The modern theory of the mode of development of our earth as also of all other planets and suns is the one known as the Nebular Hypothesis which is the prelude to the great theory of Evolution and which teaches us that the earth the sun the moon the planets and all the heavenly host are the effects or results of the condensation of a nebulous vapour which took place many millions of years ago after having been diffused for an incalculable period of time throughout the illimitable expanse of space The cause of this nebulous vapour or attenuated matter is unknown to us and will probably ever remain enshrouded in the profound mystery which at present envelopes it Beyond this limit all is mere speculation or hypothesis and the Agnostic philosopher and the man of science humbly acknowledging their complete inability to solve this mighty problem of ultimate causation are content to leave further speculation in this direction to metaphysicians and poets During many long ages this process of condensation of the nebulous vapour steadily continued being controlled by the laws of gravitation and transformation until at length a number of rotating spherical nebular masses were formed in a state of high heat from the shock of their recently united atoms which spheres gradually cooled by radiation consequently contracting and becoming possessed of a more rapid rotary motion giving off from their equatorial regions large rings of vapour which in their turn condensed and under the influence of the same two laws formed separate spheres for themselves This is the mode by which our planetary system was formed as taught by Laplace and accepted by the scientists of to day The earth then in common with other planets may be said to have passed from the condition of a gaseous to a highly heated fluid mass and to have gradually become plastic and moulded by revolution on its own axis to its present shape i e an oblate spheroid or globe flatter at the poles than at the equator with a polar diameter about twenty six miles shorter than the equatorial diameter This is the shape that all plastic bodies which rotate on their axes must assume as we are clearly taught by mathematics To be continue in this ebook
