Biz Jets:

Biz Jets Almarin Phillips, A. Paul Phillips, Thomas R. Phillips, 2012-12-06 **Biz Jets Technology and Market Structure in the Corporate Jet Aircraft Industry** traces the development of business jet aircraft from the mid 1950s through early 1993. It begins with a discussion of the technological and market opportunities existing in the period prior to the introduction of the Lockheed JetStar and the North American Sabreliner. The subsequent appearances of other biz jets the Learjets HS 125s Jet Commanders Falcons Gulfstreams Citations Challengers Mitsubishi's and derivative aircraft are treated in considerable detail. **Biz Jets** also covers planes involved in many unsuccessful attempts to enter the industry from 1955 through 1993. The study shows that while the industry has been quite concentrated throughout its history the positions of the leading firms have always been contestable. Indeed leaders at one point in time have often been displaced by others who succeeded in marshalling technological and market opportunities to their advantage. Manufacturers have had to undertake continuous efforts to improve the price performance characteristics of their aircraft to gain and hold their market shares. Rivalries in the effective use of the stream of new technologies have brought forth new aircraft with both better performance and lower operating costs. At the same time however participation in the market has been extremely risky. Only a few companies have been able to earn profits. Entries, exits and mergers have altered the structure of the industry but it remained decidedly unstable at least through 1992.

Subsonic versus Supersonic Business Jets - Full Concept Comparison considering Technical, Environmental and Economic Aspects Michael Hans-Reichel, 2012-01-19 **Inhaltsangabe Introduction** On the 26th of August 2010 the new ultra large cabin ultra long range Gulfstream G650 business jet reached Mach 0.995 during its flight test campaign 1. This is almost the speed of sound Mach 1 and inspires one to say why not fly faster than the speed of sound. Reduce travelling time in the commercial business aviation segment. This is however not a completely new vision. Many companies and research facilities have already spent a lot of time and investment in studies to investigate the feasibility of supersonic flight. **Entry Into Service** EIS for the new Gulfstream G650 is scheduled for 2012. In the following the main performance parameter of the G650 aircraft will be summarised. The parameters range cruise speed MTOW etc have been selected and serve as a basis to allow an appropriate comparison between the G650 as the latest high end Subsonic Business Jet and potential in future Supersonic Business Jets SSBJ within this subject Master Thesis. With the impressive maximum range of nearly 13 000 km the G650 can connect Dubai with New York or London with Buenos Aires within almost 14 hours. **Maximum Range Normal Cruise Speed** 7 000 nm 12 964 km **Normal Cruise Speed** Mach 0.85 904 km/h **Mmo Maximum Operating Mach Number** Mach 0.925 **Maximum Cruise Altitude** 51 000 ft 15 545 m **Maximum Takeoff Weight MTOW** 99 600 lb 45 178 kg **Maximum Fuel Weight** 44 200 lb 20 049 kg **Passengers** 11-18 **Price** appr 60-70 million USD. Gulfstream business rival Bombardier Aerospace also announced in October 2010 two new high end models the Global 7000 and 8000 with a maximum range of 7 300 nm 13 520 km and 7 900 nm 14 631 km at cruise speed Mach 0.85. **Entry Into Service** is scheduled

for 2016 Global 7000 and 2017 Global 8000 A comprehensive overview of business jets in service and in development is given in attachment 13 1 A Supersonic Business Jet flying at Mach 2 cruise speed could virtually halve the travelling time which would enormously enhance the mobility and flexibility In order to achieve this ambition a paradigm shift is required New technologies must be established the impact on the environment must be understood and minimised existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable All of the above aspects must be considered and will be subject for discussion within this Master Thesis See also figure **Southwestern Aviation** ,1970 **Cognitive Task Analysis of Business Jet Pilots' Weather Flying Behaviors: Preliminary Results** ,2001 Aviation News ,2003-07 *Biz Jets* Peter R.
