Understanding Early Civilizations Bruce G. Trigger,2003-05-05 This book offers the first detailed comparative study of the seven best documented early civilizations ancient Egypt and Mesopotamia Shang China the Aztecs and adjacent peoples in the Valley of Mexico the Classic Maya the Inka and the Yoruba Unlike previous studies equal attention is paid to similarities and differences in their sociopolitical organization economic systems religion and culture Many of this study's findings are surprising and provocative Agricultural systems technologies and economic behaviour turn out to have been far more diverse than was expected These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour

*In Search Of The First Civilizations* Michael Wood,2013-04-30 Five thousand years ago there began the most momentous revolution in human history Starting in Mesopotamia city civilization emerged for the first time on earth to be followed in Egypt India China and the Americas The ideals of these ancient civilizations still shape the lives of the majority of mankind In Search of the First Civilizations previously published as Legacy asks the intriguing question what is civilization Did it mean the same to the Chinese the Indians and the Greeks What can the values of the ancient cultures teach us today And do the ideals of the West a latecomer to civilization really have universal validity In this fascinating historical search Michael Wood explores these ancient cultures looking for their essential character and their continuing legacy A brilliant exploration Sunday Times Well written gorgeous and guaranteed to induce thought Wood takes great care to put everything in a large historical perspective which is actually more disturbing than comforting New York Post

*The Ancient Chinese Super State of Primary Societies* You-Sheng Li,2010-06-04 The world has entered a new era that humans have never experienced before Scholars predict that different cultures will replace nations to compete with each other to find a better way of life for humans The modern world with a powerless United Nations as a platform for countries to work out their difference at various levels in pretty much like the ancient Chinese super state of primary societies from 2200 BC to 476 BC when Taoist lifestyle was popular If all human societies are divided into the genetically coded primary society and the man made secondary society Western civilization

started with secondary societies while Chinese civilization started with primary societies Taoist philosophy summarizes the lifestyle in the ancient primary society Taoism emphasizes the value of naturalness and simplicity which is well complimentary to the modern philosophy of materialism This book contains 14 essays The first one presents an outline and the remaining ones explore various aspects of Taoist philosophy in modern terms The author has made every effort to accommodate both academic and general readers There are four academic essays that all start with a summary which allows general readers to know the main content if they decide to skip over the main part of the essay The remaining essays provide a much lighter reading from the author s own experience to the lives his mother and grandmother had lived Book Review By Kevin Brown FROM SAN FRANCISCO BOOK REVIEW Amazon Star Rating 5 out of 5 Has the world shrunk Airlines can get us to places quicker than a dog can get fleas Phones and computers make connecting to our neighbors faster and more reliable Even with advancements like this society and culture as shared ideals lag behind Even moving to a new state in this country has certain social aspects that take time to learn This book The Ancient Chinese Super State of Primary Societies is a deep personal discussion about the ramifications of Old World philosophy and New World modernism The book is composed of 14 different essays all centering on the topic of Chinese and European societies The point I feel is not only to help people understand and respect Chinese philosophies more but to explain why these concepts are still valid in our modern world The book mainly consists of a compare and contrast of opinions that help prove You Sheng Li s theses One part talks about how the Chinese were more of a land based people and Europeans were more oceanic therefore Europeans were the explorers There are interesting little nuggets inside each essay and it s a treat to read them all Each essay is incredibly well cited with notes and references listed at the end It is always wonderful to see where a book gets its ideas You Sheng Li displays that he is one of the most certifiable person to write on this subject With the writing style as direct as a surgeon he is able to craft an engaging and thoughtful experience The short essay also gives the book a quick and fun pace to the read Each essay many be different but each is as enjoyable as the next With a wealth of information this is one of the must read books on this topic

*Chinese Culture, Western Culture* Tai Ng, 2007-02 This book explores how complementary Chinese and Western cultures are how they should learn

from each other to establish a dynamic balance and how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization
