DEPARTMENT OF DEFENSE, 1998* China Debates the Future Security Environment Michael Pillsbury, 2000 This study offers over 600 selected quotations from the writings of over 200 Chinese authors published from 1994 to 1999 Analysis and interpretation are kept to a minimum so that the Chinese may speak for themselves Many Chinese scholars assisted with this study by providing hard to get books and articles unfamiliar to most Westerners Half the authors were interviewed in China They explained some of the viewpoints in recent debates about the future security environment Debates in China are generally concealed and frequently authors pretend they do not exist However muted they may be China's debates about the future nevertheless exist and merit attention if we are to understand the premises of China's national strategy and set a baseline from which to measure any future change in these premises **An Assessment of China's View on the Revolution in Military Affairs and Future Warfare** Paul Christian, Naval War College, 1998 China's explosive economy has financed her recent modernization program Not only is China modernizing her armed forces but many of her senior military authors are advocating a RMA and expounding on its potential value to future warfare Due to China's existing technology gap there are skeptics in the United States who doubt that she will be able to keep pace with the American conception of RMA However the Chinese view of RMA may be completely different from the Western view With a regional strategic and operational focus and employing the fruits of RMA the Chinese may be able to develop highly complex asymmetrical capabilities and operational techniques that deny area access to a U S military force thus limiting American ability to influence the situation The results of this analysis suggest that even though China will be unable to completely technically with America for a least a decade and maybe longer nevertheless the U S needs to develop plans concepts and countermeasures to defeat future Chinese asymmetrical warfare that is based on rapid advances in technology Chinese Information Warfare Toshi Yoshihara, 2001 China's Strategic Intentions and Goals United States. Congress. House. Committee on Armed Services, 2000 **Chinese Information Warfare** Toshi Yoshihara, 2001 The author explores what he perceives to be China's pursuit of information warfare IW as a method of fighting asymmetric warfare against the United States He believes the Chinese are seeking ways to adapt IW to their own style of warfare Paradoxically he observes that the Chinese have not gleaned their intelligence through espionage but through careful scrutiny of U S IW in practice The author examines those aspects of IW PSYOPS Denial and Deception that China believes provides the greatest prospects for victory in a conflict Not surprisingly Sun Tzu is interwoven into this emerging theory Targeting the enemy's nervous system at all levels that is his ability to gather and assess information and then transmit orders provides significant advantages in the prosecution of a campaign He concludes that the extent of Chinese advances or intent regarding IW is difficult to ascertain given its closed society Chinese IW may still be nascent but the menacing intent is there and only vigilance will protect the United States *The Future of War* Mark David Mandel, 2005 Explains the radical changes in military technology that have reshaped the U S military and argues for significant restructuring of the defense bureaucracies to take full advantage of

this revolution **China, Nuclear Weapons, and Arms Control** Robert A. Manning, Ronald N. Montaperto, Brad Roberts, 2000 The authors then elaborate a preliminary agenda for exploring with China the requirements of strategic stability in the emerging era and of testing Beijing's intention to continue some form of restraint in the years ahead BOOK JACKET **The Journal of Social, Political and Economic Studies** ,1981 **The New Republic** ,1922 China Monthly Review ,1920 **Information Age and India** Akshay Joshi, 2001 Information Age and India provides a holistic analysis of the impact of the information revolution on the three pillars of national power political economic and military power The book concludes that India can claim real success in exploiting the information revolution only if it can bridge the digital divide Therefore it is important to use IT for developmental purposes Civil-military Change in China Andrew Scobell, Larry M. Wortzel, 2004 In November 2002 the Chinese Communist Party held its 16th Congress and formally initiated a sweeping turnover of senior leaders in both the Party and the People's Liberation Army PLA The meeting heralded not merely a new set of personalities in positions of political and military power but also the emergence of a new generation of leaders Who are these individuals and what does their rise mean for the future of China and its military China matters to the United States because of its size its spectacular patterns of growth its profound problems linked to rapid growth and its military intentions Facts and trends are examined to explain the divisions and cohesions in the Chinese leadership and their potential significance to the United States and the rest of the world Also examined is how Chinese policies have evolved over the years and how important the United States has been in influencing China's strategy What for instance will the emerging leadership with its factious differences do about Taiwan and North Korea *The American Monthly Review of Reviews* ,1900 **The Next Christendom** Philip Jenkins, 2007 The first edition of *The Next Christendom* has been hailed as a landmark in our understanding of modern Christianity In this new and substantially expanded second edition Jenkins continues to illuminate the remarkable expansion of Christianity in the global South in Africa Asia and Latin America as well as the clash between Islam and Christianity since September 11 Among the major topics covered are the growing schism between Northern and Southern churches over issues of gender and sexuality immigrant and ethnic churches in North America and a special section on the split within the Anglican Communion The first in a three book trilogy on the changes besetting modern Christianity this award winning book will be welcomed by all of those who have come to recognize Philip Jenkins as one of our leading commentators on religion and world affairs
