Medication safety is underscored through Medication Safety Alerts and Clinical Pitfall boxes, as well as Do Not Confuse and High Alert icons. Unit on medication administration clearly and visually outlines assessment techniques, procedures, and documentation for safe administration of percutaneous, enteral, and parenteral drugs. Application of the nursing process offers an overview of general principles of nursing care for each disorder, as well as specific nursing considerations for the drug treatment. Lifespan Considerations boxes for children and for older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. Drug tables clearly outline generic and brand names, availability, and dosage ranges for key medications for each disorder. Clinical Goldmine boxes focus on best practices in the clinical setting. Get Ready for the NCLEX Examination section at the end of each chapter covers key points from the chapter, as well as review questions to help prepare for course assessments and the NCLEX Examination. Video clips on medication administration procedures provide a visual reference for safe medication administration.
