DEMOCRACY AND EDUCATION

NOAM CHOMSKY

Edited and Introduced by Donaldo Macedo

The topic that was suggested, which I'm very happy to talk about, is "Democracy and Education." The phrase *democracy and education* immediately brings to mind the life and work and thought of one of the outstanding thinkers of the past century, John Dewey, who devoted the greater part of his life and his thought to this array of issues. I guess I should confess a special interest. His thought was a strong influence on me in my formative years—in fact, from about age two on, for a variety of reasons that I won't go into but are real. For much of his life—later he was more skeptical—Dewey seems to have felt that reforms in early education could be in themselves a major lever of social change. They could lead the way to a more just and free society, a society in which, in his words, "The ultimate aim of production is not production of goods, but the production of free human beings associated with one another on terms of equality." This basic commitment, which runs through all of Dewey's work and thought, is profoundly at odds with the two leading currents of modern social intellectual life: one, strong in his day—he was writing in the 1920s and 1930s about these things—is associated with the command economies in Eastern Europe, the systems created by Lenin and Trotsky and turned into an even greater monstrosity by Stalin. The other, the state capitalist industrial society being constructed in the U.S. and much of the West, with the effective rule of private power. These two systems are similar in some fundamental ways, including ideologically. Both were, and one of them remains, deeply authoritarian in fundamental commitment, and both were very sharply and dramatically
