Cities and the Shaping of Memory in the Ancient Near East Ömür Harmanşah, 2013-03-18 This book investigates the founding and building of cities in the ancient Near East The creation of new cities was imagined as an ideological project or a divine intervention in the political narratives and mythologies of Near Eastern cultures often masking the complex processes behind the social production of urban space During the Early Iron Age c 1200 850 BCE Assyrian and Syro Hittite rulers developed a highly performative official discourse that revolved around constructing cities cultivating landscapes building watercourses erecting monuments and initiating public festivals This volume combs through archaeological epigraphic visual architectural and environmental evidence to tell the story of a region from the perspective of its spatial practices landscape history and architectural technologies It argues that the cultural processes of the making of urban spaces shape collective memory and identity as well as sites of political performance and state spectacle

Chora 2 Alberto Pérez-Gómez, Stephen Parcell, 1996-09-19 Karsten Harries provides a new and long overdue reading of Martin Heidegger s well known essay Building Dwelling Thinking Donald Kunze and Stephen Parcell consider possibilities of meaningful architectural space for a visual culture continuing themes they addressed in Chora 1 Further reflections on the spaces of literature cinema and architecture include an interview with French writer and film maker Alain Robbe Grillet and articles by Dagmar Motycka Weston on the surrealist city Tracey Eve Winton on the museum as a paradigmatic modern building and Terrance Galvin on spiritual space in the works of Jean Cocteau Jean Pierre Chupin and Bram Ratner explore historical themes in their essays on French Renaissance architect Philibert de l Orme and the Jewish myth of the Golem Gregory Caicco addresses ethical questions in his essay on the Greek agora and the death of Socrates as does Lily Chi in her meditation on the critical issue of use in architectural works A concern with architectural representation and generative strategies for the making of architecture is present throughout especially in the essay by Joanna Merwood on the provocative House by British artist Rachel Whiteread

Violent Games Gareth Schott, 2016-07-28 It was over a decade ago that experimental psychologists and media effects researchers declared the debate on the effects of violent video gaming as essentially over referring to the way violence in videogames increases aggressive thoughts feelings and behaviors in players Despite the decisive tone of this statement neither the presence nor popularity of digital games has since diminished with games continuing to attract new generations of players to experience its technological advancements in the narration of violence and its techniques of depiction Drawing on new insights achieved from research located at an intersection between humanities social and computer sciences Gareth Schott's addition to the Approaches in Digital Game Studies series interrogates the nature and meaning of the violence encountered and experienced by game players In focusing on the various ways violence is mediated by both the rule system and the semiotic layer of games the aim is to draw out the distinctiveness of games exploitation of violence or violent themes An important if not canonical text in the debates about video games and violence Violent Games constitutes an essential book for those wishing to make sense of the experience offered by games as technological aesthetic and communicational phenomena in the context of issues of media regulation and the classification of game content as violence

Analogical Thinking in Architecture Jean-Pierre Chupin, 2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the second investigates the staying power of

biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories

Architecture and Memory Robert Kirkbride, 2008-11-11 The studioli of the ducal palaces at Urbino and Gubbio Italy demonstrate architecture's capacity to transact between the mental and physical realms of human experience Constructed between 1474 and 1483 for the military captain Federico da Montefeltro and his young motherless son the studioli may be described as treasuries of emblems they contain not things but images of things rendered with remarkable perspectival exactitude These small image filled chambers reflect how architecture and its ornament equipped a quattrocento mind with metaphors for wisdom and methods for statecraft and intellectual activity Drawing on the densely layered imagery in the studioli and text sources readily available to the Urbino court Robert Kirkbride examines the position of the studioli in the Western tradition of the memory arts considering how architecture bridged the mathematical arts which lent themselves to mechanical pursuits and the art of rhetoric a discipline central to memory and eloquence As subtle ramifications of material and mental craft the studioli provided ideal methods for education and prudent governance extending an ancient legacy of open ended models that were conceived to activate the imagination and exercise the memory At the time of their construction the studioli represented the leading edge of technologies of visual representation and offer a case study of how contemporary advances in interactive technologies reactivate and transform ancient metaphors for thought and learning

Ceilings and Dreams Paul Emmons, Federica Goffi, Jodi La Coe, 2019-07-08 Where is the space for dreaming in the twenty first century Lofty thoughts like dreams are born and live overhead just as they have been represented in Renaissance paintings and modern cartoons Ceilings are often repositories of stories events and otherwise invisible oneiric narratives Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges and almost all of our thinking debating and decision making takes place under endless ceiling grids Quantitative research establishes that spaces with taller ceilings elicit broader more creative thoughts Today ceilings are usually squat conduits of technology they have become the blind spot of modern architecture The twenty essays in this book look across cultures places and ceilings over time to discover their potential to uplift the human spirit Not just one building element among many the ceiling is a key to unlock the architectural imagination Ceilings and Dreams aims to correct this blind spot and encourages architects and designers researchers and students to look up through writings organized into three expansive categories reveries suspensions and

inversions The contributors contemplate the architecture of levity and the potential of the ceiling once again as a place for dreaming *Drawing Imagining Building* Paul Emmons,2019-04-01 *Drawing Imagining Building* focuses on the history of hand drawing practices to capture some of the most crucial and overlooked parts of the process Using 80 black and white images to illustrate the examples it examines architectural drawing practices to elucidate the ways drawing advances the architect s imagination Emmons considers drawing practices in the Renaissance and up to the first half of the twentieth century Combining systematic analysis across time with historical explication presents the development of hand drawing while also grounding early modern practices in their historical milieu Each of the illustrated chapters considers formative aspects of architectural drawing practice such as upright elevations flowing lines and occult lines and drawing scales to identify their roots in an embodied approach to show how hand drawing contributes to the architect s productive imagination By documenting some of the ways of thinking through practices of architectural handdrawing it describes how practices can enrich the ethical imagination of the architect This book would be beneficial for academics practitioners and students of architecture particularly those who are interested in the history and significance of hand drawing and technical drawing

Icons of Space Jelena Bogdanović,2021-07-26 *Icons of Space Advances in Hierotopy* brings together important scholars of Byzantine religion art and architecture to honour the work of renowned art historian Alexei Lidov As well as his numerous publications Lidov is well known for developing the concept of hierotopy an innovative approach for studying the creation of sacred spaces Hierotopy and the related concepts of spatial icons and image paradigms emphasize fundamental questions about icons including what defines them as structures spaces and experiences Chapters in this volume engage with the overarching theme of icons of space by employing contrasting and complementing methods of hierotopy with more traditional approaches such as iconography Examinations of icons have traditionally been positioned within strictly historical theological socio economic political and art history domains but this volume poses epistemological questions about the creation of sacred spaces that are instead inclusive of multi layered iconic ideas and the lived experiences of the creators and beholders of such spaces This book contributes to image theory and theories of architecture and sacred space Simultaneously it moves beyond colonial studies that predominantly focus on questions of religion and politics as expressions of privileged knowledge and power This book will appeal to scholars and students of Byzantine history as well as those interested in hierotopy and art history *Ezechielem Explanationes* Juan Bautista Villalpando,2009 This is the first translation into

English of Juan Bautista Villalpando s Book Five of *In Ezechielem Explanationes et Apparatus Urbis Templi Hierosolymitani* After its publication in 1604 the work stimulated a debate over not only the architecture of Solomon s Temple but on the very nature of the origins of architecture that endured for more than one hundred and fifty years in the form of commentaries and other reconstructions *From the Detail* Karen Michelle Richards,2005 **Re/constructing Sanctuary** Caitlin Laird Glasser,2002
