New Perspectives in Economics Emerald Group Publishing Limited, 2015-11-02 New Perspectives in Economics A United States

Focus is a new collection of topical articles that examine the changing economic landscape in the United States of America. This book provides researchers, professionals, managers, and policy makers with an easy-to-read selection of interesting research articles.

Measuring Poverty Dynamics and Inequality in Transition Economies Erzo F. P. Luttmer, 2001. Estimates of income inequality and the dynamics of poverty are highly sensitive to measurement error and transitory shocks in micro-level data. The apparent high levels of economic mobility in Poland and Russia are driven largely by transitory shocks and noisy data. There is a real risk of an entrenched underclass emerging in these transition economies.

Distributions in Motion Francisco H.G. Ferreira, 2010. **Income Inequality and Poverty** Claudia Biancotti, 2004. Inequality Beyond Globalization Christian Suter, 2010. This volume debates the complex nature of the relationships between globalization, social and economic transformations, and growing inequalities. Employing a global, world-historical, and comparative perspective, the 16 articles brought together in this volume deal with three central questions: Firstly, the question of the spatio-temporal evolution and variations of growing inequalities; secondly, the relative importance of globalization as compared to other factors explaining growing inequalities; and thirdly, institutional variations of inequality dynamics and globalization impacts. Christian Suter is Professor of Economic Sociology at the University of Neuchâtel and President of the World Society Foundation, domiciled at the University of Zurich, Switzerland.

Dynamics of Deprivation Zsuzsa Ferge, Seymour Michael Miller, 1987. **Poverty Dynamics** Tony Addison, David Hulme, Ravi Kanbur, 2009-01-22. This collection of essays provides a state-of-the-art examination of the concepts and methods that can be used to understand poverty dynamics. It does this from an interdisciplinary perspective and includes the work of anthropologists, economists, sociologists, and political scientists. The contributions included highlight the need to conceptualise poverty from a multidimensional perspective and promote 'Q-Squared' research approaches or those that combine quantitative and qualitative research. The first part of the book provides a review of the research on poverty dynamics in developing countries. Part two focuses on poverty measurement and assessment and discusses the most recent work of world-leading poverty analysts. The third part focuses on frameworks for understanding poverty analysis that avoid measurement and instead utilise approaches based on social relations and structural analysis. There is widespread consensus that poverty analysis should focus on poverty dynamics, and this book shows how this idea can practically be taken forward.

EUI Review, 2007. The Causes and Dynamics of Social Exclusion Among Immigrants in Europe, 2003. **Household Intertemporal Decisions and Poverty Dynamics** Munenobu Ikegami, 2008. *The Dynamics of Social Exclusion in Europe* Eleni Apospori, J. Millar, 2003. Issues of poverty and social exclusion are high on the European policy agenda. This book reports findings from a study funded by the European Commission using data from the European Community Household Panel with a multi-dimensional approach to international comparisons of poverty and social exclusion.

The Measurement of Individual Well-Being and Group Inequalities Joseph Deutsch, Jacques Silber, 2013-07-31. Although most traditional economic theory puts the individual at the centre of analysis

more recent approaches have acknowledged the importance of a wider sense of identity as a determinant of individual behaviour Whether it is ethnicity religion or gender group membership is a central part of human life This book presents new advances in areas which consider both the individual and the group when measuring inequalities and well being The first part of the book covers topics such as relative deprivation and happiness domains where even economists have now recognized the importance of reference groups in the assessment of individuals well being The second part is devoted to the concept of polarization a growing field of inquiry among economists The third part looks at income and wage intra generational mobility while the fourth part reports on recent advances in measuring the significant differences between and within groups The book concludes with several chapters devoted to poverty and social exclusion stressing in particular the need for a multidimensional approach to these topics This collection offers a fresh look at the way individual well being should be measured by emphasizing the role of reference groups and the idea of polarization as well as stressing the impact on well being of changes over time to the relative position of individuals This book should be of interest to graduate students and researchers working in the field of development economics inequality and poverty

New Perspectives on Structural Change Ludovico Alcorta,Neil Foster-McGregor,Bart Verspagen,Adam Szirmai,2021-03-23 New Perspectives on Structural Change is a comprehensive edited volume that outlines both the historical roots and state of the art debates on the role of structural change in the process of economic development including both orthodox and heterodox perspectives and contributions from prominent scholars in this field The volume consists of four main sections The first section covers the theoretical foundations of the structural change literature The second section presents an empirical overview of the major trends of structural change using up to date data sources and methods The third section presents a broad ranging empirical analysis of the drivers of structural change The fourth section examines how processes such as inclusive growth poverty reduction productive employment the global income distribution and environmental sustainability are affected by structural change and how they can be influenced by policy
