HOW TO COLLECT INFORMATION THROUGH NON -
EXPERIMENTAL METHODS:

SCIENTIFIC COMMUNICATION PARADIGIAM

Interviewing is one of the methods to collect information from the participants. It is non-experimental research design in order to gather information from the concerned person(s) for example ,job applicants , prospective employee , students , patients , parents .Interviewing is a temporarily relationship between two or more than two persons . Note interviewing is based upon theory of information. This process is a complex phenomenon. In some cases information may be recent .So respondents may be able to provide answer . If the event occurred in the past , it may be difficult to recall it .In this case Regression technique may be useful. For example, interviewer is interested to know socialization process of Mr. Z, aged 30 years when he was ten years old. One can imagine difficulty level of recalling details of socialization techniques used by parents. In this case, interviewer use regression technique. Main event is associated with relevant past event. For example, tell me names of your class fellows .This question is ambiguous .Grade is not clear , gender is not
