Dysfunctional Digressions Bruce L. Marcoon,2004 *The Lamb That Was Slain* Shyann Hine,2004-07-09 When Larry the lamb hears about the slain lamb he takes a journey to find out why this happened Along the way various animals tell the story of the Lamb of God who was not a lamb like him at all *Digressions in Classical Historiography* Mario Baumann,Vasileios Liotsakis,2024-04-01 Although digressive discourse constitutes a key feature of Greco Roman historiography we possess no collective volume on the matter The chapters of this book fill this gap by offering an overall view of the use of digressions in Greco Roman historical prose from its beginning in the 5th century BCE up to the Imperial Era Ancient historiographers traditionally took as digressions the cases in which they interrupted their focused chronological narration Such cases include lengthy geographical descriptions prolepses or analepses and authorial comments Ancient historiographers rarely deign to interrupt their narration s main storyline with excursuses which are flagrantly disconnected from it Instead they often coat their digressions with distinctive patterns of their own thinking thus rendering them ideological and thematic milestones within an entire work Furthermore digressions may constitute pivotal points in the very structure of ancient historical narratives while ancient historians also use excursuses to establish a dialogue with their readers and to activate them in various ways All these aspects of digressions in Greco Roman historiography are studied in detail in the chapters of this volume **Interpretation and Understanding** Marcelo Dascal,2003-10-31 Our species has been hunting for meaning ever since we departed from our cousins in the evolutionary tree We developed sophisticated forms of communication Yet as much as they can convey meaning and foster understanding they can also hide meaning and prevent comprehension Indeed we can never be sure that a yes conveys assent or that a smile reveals pleasure In order to ascertain what communicative behavior means we have to go through an elaborate cognitive process of interpretation This book deals with how we achieve the daily miracle of understanding each other Based on the author s contributions to pragmatics the book articulates his perspective using the insights of linguistics the philosophy of language and rhetoric and confronting alternatives to it Theory formation is shaped by application to fields of human activity such as legal practice artificial intelligence psychoanalysis the media literature aesthetics ethics and politics where interpretation and understanding are paramount Using an accessible language this is a book addressed to specialists as well as to anyone interested in interpreting understanding and understanding the potentialities and limits of interpretation **English Education** ,1978 **Practical Guide to Performance Appraisal** Richard I. Henderson,1984 PTL ,1979 **Performance Appraisal** Richard I. Henderson,1984 **Social Work Papers** University of Southern California. School of Social Work,1981 **Theodahad** Massimiliano Vitiello,2014-07-31 Educated in Platonic philosophy rather than the military arts the Ostrogothic king Theodahad was never meant to rule His unexpected nomination as co regent by his cousin Queen Amalasuintha plunged him into the intrigues of the Gothic court and Theodahad soon conspired to assassinate the

queen But once alone on the throne his lack of political experience and military skill made him ineffective at best and dangerously incompetent at worst Defeated by the Byzantine emperor Justinian Theodahad was killed by his own subjects In Theodahad Massimiliano Vitiello rigorously investigates the ancient sources in order to reconstruct the events of Theodahad s life and the contours of sixth century diplomacy and political intrigues Painting a picture of an unlikely king whose reign helped spell the end of Ostrogothic Italy Vitiello s book not only illuminates Theodahad s own life but also offers new insight into the sixth century Mediterranean world

Kerr, 2009 What does the place of information within the cosmos have to do with the life of any one person or with the nature of right and wrong It changes everything Information can be viewed as nothing more than an ephemeral artefact of matter energy space and time Or it can be viewed as a component of the universe every bit as real and consequential as the others This book shows not only that information is real in its own right but that the intelligence found in people would not have come into existence if it were not The most powerful tool and weapon of humans is the information system their minds together comprise Individuals in all their variety are the way they are because that is the way that together they are most intelligent From the evolutionary mechanism which generated human intelligence to the affairs of people today the driving force has always been the role of information in individual lives The result of their decisions through the distant past has been a kind of intelligence new in the universe People together form a functional mental system that is of a higher order of complexity and intelligence than any individual mind could be Individual minds are designed not to survive alone in a wilderness but to complement the human information system as a whole To make the system function human intelligence and morality necessarily evolved together People can think together only if they get along The basic outlines of morality are as fixed and timeless and as rooted in human evolution as the intelligence it evolved with Each is both cause and product of the other The intelligence of the human information system as a whole is the central principle of human life Acknowledging the reality of information changes forever the divide between secular and religious outlooks Religions envision the information world by belief in an invisible network of connections between people and the world around them But these connections exist in hard reality because the existence of information is just as real and provable as the existence of rocks Dividing reality by believing that physical things are real and information is not trivialises the most important aspect of human existence Once the illusion that information is not real is given up the basic relationships of life re assume the kinds of firm definitions that they have always been given by religions To live in harmony with the reality of information each person must find a way to recognise that their own thoughts and feelings which consist of information are just as real as any objects they think about This has always been the essential doorway to reality opening to a world of enormous intelligence love and beauty Reasons to care about other people appear

clearly and simply as features of the way things are endowing every life with a sense of purpose as an indispensable element of the human information system Together humans exist to wonder and speculate create and explore seek truth and solve the riddles of the universe
