Dyslexia The Problem Of Reading Retardation

Louise Spear-swerling

Dyslexia The Problem Of Reading Retardation:

Dyslexia; the Problem of Reading Retardation T. S. Hepworth,1971 *Dyslexia* Thomas S. Hepworth,1972 *Dyslexia: Problems of Reading Disabilities* Herman K. Goldberg,Gilbert B. Schiffman,1972 Off Track Louise Spear-swerling,2018-03-05

The identification of poor readers as learning disabled can be the first of many steps toward consigning students to a lifetime of reading failure The very label that is meant to help children often becomes a burden that works against effective learning throughout their schooling In this book the authors identify the dangers of labeling children as reading or learning disabled contending that a reading disability is not a unitary phenomenon In order to diagnose and help children educators and parents need to understand the multiple sources of reading difficulty before they can choose appropriate means to correct it Drawing on recent research in cognitive psychology the authors present a new theoretical model of reading disability that integrates a wide variety of findings across age and grade spans Laid out in terms that are readily comprehensible to parents and practitioners the model outlines the phases that are characteristic of the path to proficient reading then describes four ways in which disabled readers may stray from this path The key to the authors work lies in the fact that youngsters who stray from the path of typical reading acquisition often are not distinguishable from other children who are classified as poor readers rather than as learning disabled This model is an especially useful one for practitioners because it both provides a broader view of reading disability than have many previous models and shows how reading disability relates to typical reading acquisition Using illustrative case studies the authors describe the four patterns of reading disability explain how to properly assess them and suggest ways to conquer them

Investigating the Issues of Reading Disabilities George Daniel Spache,1976 **Handbook of Reading Disability Research** Anne McGill-Franzen,Richard Allington,2010-09-17

Bringing together a wide range of research on reading disabilities this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective Emphasizing that learning to read proficiently is a long term developmental process involving many interventions of various kinds all keyed to individual developmental needs it addresses traditional questions What is the nature or causes of reading disabilities How are reading disabilities assessed How should reading disabilities be remediated To what extent is remediation possible but from multiple or alternative perspectives Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research the volume is on the front line in exploring the relation of reading disability to learning and language to poverty and prejudice and to instruction and schooling The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers

Basic

Facts about Dyslexia & Other Reading Problems Louisa Cook Moats, Karen E. Reading Retardation and Multi-Sensory Teaching (Psychology Revivals) Charles Hulme, 2014-10-14 Originally published in 1981 this title is based on the author's doctoral thesis and the research reported was carried out at the Department of Experimental Psychology University of Oxford By the 1980s it was generally recognised that there are a number of children of adequate general intelligence who nevertheless experience inordinate difficulties in learning to read This book examines some of the possible reasons for those children's reading difficulties and at the same time explores the basis of a teaching technique which was reputed to help them to learn to read Although the terminology is very much of the time this book will still be of interest to those concerned with the reasons behind the difficulties children have in learning to read

Reading Disabilities B. Pennington, 1992-01-31 This book is unique in that it brings together in one place an account of recent advances in our

understanding of the biology of dyslexia It grew out of a Rodin Remediation Foundation International conference held on this topic in Boulder Colorado in 1990 which included most of the world s experts on the genetics and neurology of dyslexia Ten years ago a volume on this topic would scarcely been possible and now we have an emerging comprehensive neuroscientific understanding of this complex behavioral disorder that goes from genes to brain to behavior Building on recent advances in the understanding of the cognitive phenotype of dyslexia these authors present new data on both the etiology and brain mechanisms underlying that phenotype Reading disability or dyslexia has a high familial recurrence rate and is partly heritable Genetic linkage studies are beginning to identify the possible locations of genes influencing this phenotype On the neurological side several independent studies have found neuroanatomical differences in the dyslexic brain which are due to early changes in brain development Thus contrary to the views held by some educators that dyslexia is a myth the results presented in this book firmly establish dyslexia as a real biological condition This book is relevant to researchers and practitioners concerned with both normal and abnormal reading development

The Connections Between Language and Reading Disabilities Hugh W. Catts, Alan G. Kamhi, 2005-01-15 This is an edited book based on papers presented at a 2003 invitee only conference under the sponsorship of the Merrill Advanced Studies Center of the University of Kansas The participants were prominent scholars in the areas of language and reading and have research programs funded by NIH and other sources The purpose of the gathering was to discuss theoretical issues and research findings concerning the relationship between developmental language and reading disabilities specifically looking at neurological behavioral and genetic factors In addition it discussed other factors contributing to reading difficulties in the middle elementary school years through adolescence and literacy outcomes for children with early language impairments and how these problems relate to children with dyslexia The Foreword is written by Reid Lyon Branch Chief Child Development and Behavior Branch NICHD National Institutes of Health This book appeals to scholars in the areas of language disorders and reading disabilities as well as to practicing speech language pathologists special educators and reading specialists It may also be used in graduate courses designed as seminars in either language disorders or reading disabilities in schools of communication disorders as well as schools of education especially special education departments

Identification of Learning Disabilities Renee Bradley, Louis Danielson, Daniel P. Hallahan, 2002-12-18 Identification of Learning Disabilities Research to Practice is the remarkable product of a learning disabilities summit conference convened by the Office of Special Education Programs OSEP in August 2001 and the activities following that summit Both the conference and this book were seen as important preludes to congressional reauthorization of

the historic Individuals With Disabilities Education Act IDEA scheduled for 2002 and subsequent decision making surrounding implementation The OSEP conference brought together people with different perspectives on LD parents researchers practitioners and policymakers and resulted in this book which examines the research on nine key issues concerning the identification of children with learning disabilities Coverage includes alternative responses to treatment classification approaches processing deficit models and approaches to decision making Chapter Structure Each of the first nine chapters is organized around a lengthy issue oriented paper which presents the most current research on that topic These primary papers are then followed by four respondent papers that reflect a variety of viewpoints on the topic Summarizing Chapter A small group of researchers listed in the final chapter dedicated an enormous amount of time to summarizing the research and developing key consensus statements regarding the identification of children with learning disabilities Their work is sure to have a tremendous impact on future discussions in this area Expertise The following well known scholars have helped summarize the vast amount of research presented in this book as well as the consensus statements derived therefrom Lynne Cook Don Deshler Doug Fuchs Jack M Fletcher Frank Gresham Dan Hallahan Joseph Jenkins Kenneth Kavale Barbara Keogh Margo Mastopieri Cecil Mercer Dan Reschley Rune Simeonsson Joe Torgesen Sharon Vaughn and Barbara Wise
