**Lifting Depression** Kelly Lambert, 2010-01-05 Today s young adults are up to ten times more likely to experience depression than their grandparents were Could it be that in our increasingly automated world the reduced physical effort needed to accomplish anything may somehow interfere with our level of happiness and subsequent responses to stress Neuroscientist Kelly Lambert finds compelling evidence that having to work hard for rewards significantly improves mood and prevents depression Beginning with her innovative research on rats she compared trust fund rats whose rewards came with no effort on their part to hard working trained to succeed rodents Lambert offers hope of treatment for people without debilitating and often ineffective drugs Drawing on a wealth of information from the fields of anthropology neuroscience and evolutionary psychology Lambert develops a unique theory suggesting that physical effort directed toward tangible outcomes activates particular regions of the brain and builds resilience against the emotional emptiness and negative thinking associated with depression Whereas most therapies emphasize the importance of mental activity Lambert

reminds us of the importance of physical activity in establishing control in a fast paced culture that is focused more on the prospect of immediate gratification than savoring the fruits of our labor     **The American Benedictine Review** ,1979
