Public Education—America's Civil Religion Carl L. Bankston, Stephen J. Caldas, 2015-04-18 In this volume the authors argue that public education is a central part of American civil religion and thus gives us an unquestioning faith in the capacity of education to solve all of our social economic and political problems The book traces the development of America's faith in public education from before the Civil War up to the present exploring recent educational developments such as the No Child Left Behind legislation The authors discuss how this faith in education often makes it difficult for Americans to think realistically about the capacities and limitations of public schooling Bringing together history politics religion sociology and educational theory this in depth examination raises fundamental questions about what education can accomplish for the citizens of the United States points out that many supposedly opposing viewpoints on public education actually arise from the same root assumptions exposes the gaps between our pursuit of equity in schools and what we really accomplish with students looks at ways in which education can be organized to serve a diverse population
