Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996

This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial, territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include a citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works, the availability of non-print formats, previous editions, and title changes, and related works. Canadian Reference Sources will be an invaluable reference tool for future scholars and researchers.

A Bibliography of Canadian Folklore in English Edith Fowke, Carole Henderson-Carpenter, 1982-12-15

This book is the only comprehensive bibliography of Canadian folklore in English. The 3877 different items are arranged by genres: folktales, folk music and dance, folk speech and naming, superstitions, popular beliefs, folk medicine, and the supernatural, folk life and customs, folk art and material culture, and within genres by ethnic groups: Anglophone and Celtic, Francophone, Indian and Inuit, and other cultural groups. The items include reference books, periodicals, articles, records, films, biographies of scholars and informants, and graduate theses. Each item is annotated through a coding that indicates whether it is academic or popular, its importance to the scholar, and whether it is suitable for young people. The introduction includes a brief survey of Canadian folklore studies, putting this work into academic and social perspective. The book covers all the important items and most minor items dealing with Canadian folklore published in English up to the end of 1979. It is concerned with legitimate Canadian folklore, whether transplanted from other countries and preserved here or created here to reflect the culture of this country. It distinguishes between authentic folklore presented as collected and popular treatments in which the material has been rewritten by the authors. Intended primarily for

scholars of folklore international as well as Canadian the book will also be of use to scholars in anthropology cultural geography oral history and other branches of Canadian culture studies as well as to librarians teachers and the general public
