

THE BRITISH HALFPENNY AS MODEL

To gain ready acceptance of their coins in circulation, coiners of Vermont, Connecticut, and Machin's Mills copper coins copied the basic designs of genuine regal British halfpence made in London, never mind that the Revolutionary War with England had ended just a few years earlier. Examples are shown here.

Authentic British halfpenny of 1731 depicting King George II (on the throne from 1727 to 1760).

Contemporary counterfeit British halfpenny of 1772 depicting King George III (ruled 1760–1830), used on coppers from 1770 to 1775.

Vermont copper of 1786 with features of King George II adapted from the British halfpenny. (Variety RR-19, always lightly struck at the centers)

Vermont copper of 1788 with features of King George III adapted from the British halfpenny. (Variety RR-20)

Connecticut copper of 1786 with features of King George II adapted from the British halfpenny. (Variety Miller 3.8-11.2)

Connecticut copper of 1788 with features of King George III adapted from the British halfpenny. (Variety Miller 4.1-K)

Machin's Mills counterfeit halfpenny of 1747 of King George II. (Variety Black 1-47A)

Counterfeit British halfpenny with the fictitious date of 1778 made at Machin's Mills in Newburgh, New York. (Variety Black 11-78A)

One New Jersey minting facility was set up in a room behind a kitchen in a private house.

Accounts of Machin's Mills

From about 1786 to 1789, Machin's Mills operated as a private mint near Newburgh, New York. In chapter 7 an account is given of many coins attributed to that facility, including certain coppers of Vermont, Connecticut, and counterfeit British halfpence, among others. Two recollections of this mint survive, both from the 1850s, when Machin's Mills was probably hazy in the memory of anyone involved. Accordingly, they must be viewed with a grain of salt. The comments are valuable in a general way, however, in that they give a view of coinage operations that must have been similar to certain other facilities.

Charles I. Bushnell, who did research in the 1850s, including correspondence with Benjamin Hall of Troy, New York, provided this account to Sylvester S. Crosby:

The mint house at Newburgh, Ulster County, New York, was situated on the east side of Machin's Lake or Pond, about one-eighth of a mile distant from the pond. The building was erected in 1784 by Thomas Machin, and was still standing in 1792, at which time the rollers, press, and cutting machine [cutting out press for planchet discs] were taken out. The coins were struck by means of a large bar loaded at each end with a 500-pound ball with ropes attached.

Two men were required on each side, making four in all to strike the pieces, plus a man to set the planchets. The metal
