 the year 2017 in the subject Economics International Economic Relations grade 1 7 University of W rzburg language English  
 abstract In 2016 Belt and Road was among the most frequently used buzzwords in Chinese media a term strongly correlated  
 to the topics mentioned The Belt and Road Initiative formerly One Belt One Road symbolizes how the lion intends to shake  
 the world In his speech at the World Economic Forum in Davos in January 2017 the leader of the Communist Party of China  
 CCP Mr Xi Jinping emphatically advocated a liberal economic globalisation environmental sustainability and abolition of  
 protectionism According to him China will be a spearhead in defending economic globalization and promoting global  
 economic development and opening up At the end of his speech the president referred to the Belt and Road Initiative BRI  
 which was launched in 2013 and pursues the goals of fostering cooperation economic development and prosperity for all  
 participating countries in a win win manner This initiative aims at nothing less than connecting Asia with Africa and Europe  
 by establishing far spreading transport infrastructure networks via land and sea fostering trade boosting economic  
 integration and increasing cultural exchange Since its launch it has attracted much attention especially concerning its  
 political implications and obstacles Besides these political discussions figures of projects usually worth billions of dollars are  
 circulating yet there are no papers examining the initiative based on economic theories and specifically focusing on the  
 initiative s true capability to increase economic development in participating countries The common assessment is that huge  
 transport and other infrastructure projects are beneficial for developing countries as they may boost trade and economic  
 growth However this simplistic assumption should not be accepted without evidence as unproductive investments can have a  
 huge negative impact on these economies thus this thesis will take a deeper look at the BRI s economic characteristics and  
 compare them to economic development theories as well as theories about the correlation of economic growth and transport  
 infrastructure investments In this way it intends to clarify the potential impact on participating countries economic  
 development      **The Nineteenth Century and After** ,1904      *Mesny's Chinese Miscellany* William Mesny,1896 A text
