

Key facts

- Girls and women appear to commit less crime.
- 4/5 convicted offenders in Britain are male.
- Women more likely to be convicted of theft and property offences.
- Men more likely to be convicted of violence and sexual offences.

The Chivalry thesis (Pollak 1950)

This argues that most police, judges and magistrates are men and men are socialised to be chivalrous to women. Roger Hood found women are 1/3 less likely to be jailed than men in similar cases. Heindersohn is highly critical of Pollak and claims it is out dated

Heindersohn

They argue the criminal justice system is **patriarchal** and is bias against women when they step outside gender roles. Women are judged more harshly for having promiscuous sex and being bad mothers rather than the seriousness of their crimes. This is what happens in rape cases where the victims sexual activity is always on trial.

Liberation thesis

Freda Alder (1975) argues that if feminists are right and women only commit less crime because of patriarchy then greater equality should see a rise in women offenders. This equality will bring about more female offenders for violence and white collar crime.

Explanations for female criminality

Feminist - Control theory (Carlen)

Women commit less crimes because men control women through domestic roles, fear of being a victim and financial dependence.

Functionalist - Sex role theory

The way girls are socialised to be quiet and demur doesn't encourage them to behave aggressively or break the law.

Chivalry Of Crime:

The Chivalry of Crime Desmond Barry,2000 This is the story of one of America s most compelling figures the outlaw gunslinger Jesse James Bringing real and invented characters together in a dramatic and moving story this mingles the life of an imaginary boy with a factually faithful account of the lives of Jesse James and Robert Ford the man who killed Jesse James

Theories of Crime Ian Marsh,2007-01-24 Presenting a clear comprehensive review of theoretical thinking on crime this book encourages students to develop a deeper understanding of classic and contemporary theories and provides an interdisciplinary approach to criminology through the contributions of sociology psychology and biology A key text for any undergraduate student following programmes in criminology and criminal justice Theories of Crime covers topics such as the historical context of crime biological explanations for criminal behaviour psychological explanations for criminal behaviour sociological explanations for the criminal behaviour the criminal behaviour of women the criminal behaviour of ethnic minorities By adopting an interactive approach to encourage students to react to the text and think for themselves this book distinguishes itself from others in the field and ensures its place as a valuable teaching resource The student centred nature of the book is further enhanced by reflective question breaks throughout the text chapter summaries suggested further reading and web sites

Crime and Criminal Justice Ian Marsh,Gaynor Melville,Keith Morgan,Gareth Norris,John Cochrane,2011-05-09 This book provides students with a comprehensive and engaging introduction to the study of criminology by taking an interdisciplinary approach to explaining criminal behaviour and criminal justice It is divided into two parts which address the two essential bases that form the discipline of criminology Part One describes discusses and evaluates a range of theoretical approaches that have offered explanations for crime Part Two offers an accessible but detailed review of the major philosophical aims and sociological theories of punishment and examines the main areas of the contemporary criminal justice system

Women's Crimes, Criminology, and Corrections Joycelyn M. Pollock,2014-04-14

Historically women have been an afterthought in criminal justice policymaking and the criminological enterprise The study of criminology has largely been the study of criminal men because women commit less crime than men More recently criminologists have paid increased attention to the population of female offenders partly because of their growing numbers and partly because of the tens of thousands of children affected by having their mothers in prison or on supervised release The recent attention however has not necessarily been a good thing for women who are much more likely to be formally prosecuted and incarcerated today than in decades

past This policy shift has come about partly because of misinformed policies implemented to help women and partly because of shifts in theorists beliefs and public perceptions that women and men are similar in their criminal motivations and should therefore be treated similarly The controversy surrounding this perception is the focus of this book To better comprehend the challenges facing women in the criminal justice system the author a winner of the Bruce Smith Sr Award from the Academy of Criminal Justice Sciences employs research findings and statistics to describe the prevalence and patterns of women s crimes review criminological theories specifically examining how well they explain female criminality understand female juvenile offenders reviewing crime rates theories relating to female delinquency and detention related issues look inside the women s prison to better understand female prisoners and their world examine classification and programming issues particularly the impact of gender specific programming and explore the problems experienced by women upon release and the related issue of women s recidivism
