Freight-demand Modeling to Support Public-sector Decision Making Cambridge Systematics,2010 This report
 presents an evaluation of possible improvements in freight demand models and other analysis tools and provides a guidebook
 to assist model developers in implementing these improvements The report is especially valuable for its findings of general
 satisfaction with methods available to support freight planning but concerns with the data available to support that planning
 As such the report focuses on ways to use existing data to develop data inputs for the model showing that existing and readily
 available data can be used to develop the inputs required by freight models The report will enable decision makers at a range
 of geographical levels to improve the usability of freight demand models Pub desc Values Education Sourcebook Douglas
