Dynamics Of Deterrence

Ronald L. Tammen

Dynamics Of Deterrence:

The Dynamics of Deterrence Frank C. Zagare, 1987 The value of a theory of deterrence lies in its ability to reconstruct and predict strategic behavior accurately and consistently Contemporary scholarship on deterrence has drawn upon decision models and classical game theory with some success to explain how deterrence works But the field is marked by unconnected and sometimes contradictory hypotheses that may explain one type of situation while being inapplicable to another The Dynamics of Deterrence is the first comprehensive treatment of deterrence theory since the mid 1960s Frank C Zagare introduces a new theoretical framework for deterrence that is rigorous consistent and illuminating By placing the deterrence relationship in a theory of moves framework Zagare is able to remedy the defects of other models His approach is illustrated by and applied to a number of complex deterrence situations the Berlin crisis of 1948 the Middle East crises of 1967 and 1973 and The Falkland Malvinas crisis of 1980 He also examines the strategic relationship between the United States and the Soviet Union from 1945 to the present Zagare studies the dynamics of both mutual and unilateral deterrence games in nuclear and non nuclear situations and the impact of credibility capability and power asymmetries on deterrence stability He shows that his theory is applicable for analyzing deterrence situations between allies as well as between hostile states One of the additional strengths of his model however is its general usefulness for other levels and settings such as deterrence games played by husband and wife parent and child employer and employee and the state and its citizens With its lucid prose and illustrative examples The Dynamics of Deterrence will be of interest to a wide audience in international relations peace studies and political science Military Technology, Armaments Dynamics and Disarmament Hans Günter Brauch, 1989 This book offers theoretical analysis on the context and on the dual function of military technology as well as case studies on the third generation of nuclear weapons on the Biological Weapons Convention Review Conference on the driving forces of chemical armament and on the military use of nuclear energy as a possible propellant for bombers and in outer space

Prosecutorial Discretion at the International Criminal Court Anni Poes, 2020-07-09 This timely book provides a comprehensive guide to and rigorous analysis of prosecutorial discretion at the International Criminal Court This is the first ever study that takes the reader through all the key stages of the Prosecutor s decision making process Starting from preliminary examinations and the decision to investigate the book also explores case selection processes plea agreements culminating in the question of how to end engagement in specific country situations The book serves as a guide to the Rome Statute through the lens of the Prosecutor s activities With its unique combination of legal theory and specific policy analysis it addresses broader questions that will be relevant to other international and hybrid criminal courts and tribunals The book will be of interest to students practitioners of law academics and the wider public concerned with international law criminal justice and international relations Macrocriminology and Freedom John Braithwaite, 2022-02-15 How can power over others be transformed to power with It is possible to transform many institutions to build societies with less predation and

more freedom These stretch from families and institutions of gender to the United Nations Some societies times and places have crime rates a hundred times higher than others Some police forces kill at a hundred times the rate of others Some criminal corporations kill thousands more than others Micro variables fail to explain these patterns Prevention principles for that challenge are macrocriminological Freedom is conceived in a republican way as non domination Tempering domination prevents crime crime prevention reduces domination Many believe a high crime rate is a price of freedom Not Braithwaite His principles of crime control are to build freedom temper power lift people from poverty and reduce all forms of domination Freedom requires a more just normative order It requires cascading of peace by social movements for non violence and non domination Periods of war domination and anomie cascade with long lags to elevated crime violence inter generational self violence and ecocide Cybercrime today poses risks of anomic nuclear wars Braithwaite s proposals refine some of criminology s central theories and sharpen their relevance to all varieties of freedom They can be reduced to one sentence Strengthen freedom to prevent crime prevent crime to strengthen freedom A true magnum opus Macrocriminology and Freedom is a thought provoking and generative book from one of criminology s intellectual giants John Braithwaite reaches far and wide across societies time and disciplines to advance no less than a theory of how to build a society that simultaneously reduces both domination and crime His ambitious ideas on cascades of non dominating collective efficacy and crime prevention for example and their connections to social movements and political freedom go well beyond usual criminological discourse Chock full of theoretical propositions and bold insights this a book that will keep criminologists busy for years Macrocriminology and Freedom should not just be read but better yet savoured Robert J Sampson Henry Ford II Professor of the Social Sciences Harvard University In this majestic theorisation of the relationship between crime and freedom John Braithwaite isolates the unique power of macrocriminology as a lens through which to comprehend and challenge many of the fundamental crises facing our planet Very few scholars have the breadth and overview to succeed in a mission of this order Braithwaite does This extraordinary book is an object lesson for all who seek to understand and resist domination and the crimes of power that flow from it Penny Green Professor of Law and Globalisation Queen Mary University of London For over 40 years John Braithwaite has been a voice of wisdom hope and humanity in criminology This dazzling new book weaves together all the main themes of his influential work reanimating many of the core concepts of the discipline as well as incorporating interdisciplinary resources from south and north east and west to produce an elegant and ambitious explanatory and normative account of crime as freedom threatening domination Decentring criminal justice as the solution to crime Braithwaite shows that on a global scale the aspiration to tackle crimes ranging from interpersonal violence through corporate crimes to ecocide lies in the development of freedom enhancing power tempering institutions in the political economic and social spheres Nicola Lacey Professor of Law Gender and Social Policy London School of Economics Macrocriminology and Freedom is a criminological epic an expansive and erudite story that sweeps across history and

contexts The book is frightening in showing how cascading events can produce catastrophes from crime to environmental destruction But in the end its message is hopeful identifying pathways or normative rivers for guiding freedom from domination and crime Drawing on his distinguished career John Braithwaite has bestowed an extraordinary gift a book like other masterpieces that will yield special insights each time we take an excursion through its pages Francis T Cullen Distinguished Research Professor Emeritus University of Cincinnati In this engaging book John Braithwaite reinvigorates discussions about crime and its control While advocating a macro approach the book is punctuated not only with insights and data from smaller scale studies conducted in a range of jurisdictions but also with auto biographical vignettes The effect creates a deeply personal account of the perils of state non state and market violence and authoritarianism and the potential and indeed duty of criminologists to work towards their reduction by refocusing their efforts on explaining and tackling crime in its myriad of forms Mary Bosworth Professor of Criminology University of Oxford and Monash University John Braithwaite has had a unique influence on criminology globally In this encyclopaedic text he synthesises a wealth of criminological knowledge particularly in the sphere of anomie theory into broader debates about the nature of domination and freedom in contemporary society He defends the relevance of criminological theory while urging criminology to be activist rather than reactive and technocratic counter hegemonic rather than neutral Not for the first time John Braithwaite has challenged criminologists to construct theories that cut across micro and macro structures This book will stir debate It deserves a broad readership Harry Blagg Professor of Criminology University of Western Australia **Journal of Peace Research** ,2002

Bytes, Bombs, and Spies Herbert Lin, Amy Zegart, 2019-01-15 We are dropping cyber bombs We have never done that before U S Defense Department official A new era of war fighting is emerging for the U S military Hi tech weapons have given way to hi tech in a number of instances recently A computer virus is unleashed that destroys centrifuges in Iran slowing that country s attempt to build a nuclear weapon ISIS which has made the internet the backbone of its terror operations finds its network based command and control systems are overwhelmed in a cyber attack A number of North Korean ballistic missiles fail on launch reportedly because their systems were compromised by a cyber campaign Offensive cyber operations like these have become important components of U S defense strategy and their role will grow larger But just what offensive cyber weapons are and how they could be used remains clouded by secrecy This new volume by Amy Zegart and Herb Lin is a groundbreaking discussion and exploration of cyber weapons with a focus on their strategic dimensions It brings together many of the leading specialists in the field to provide new and incisive analysis of what former CIA director Michael Hayden has called digital combat power and how the United States should incorporate that power into its national security strategy American Defense Policy Peter L. Hays, Brenda J. Vallance, Alan R. Van Tassel, 1997 defense policies reviewing excerpts from key defense policy statements and assessing the likely challenges for future policy makers Brent Scowcroft International Affairs **Weapons Proliferation in the 1990s** Brad Roberts, 1995 The proliferation of

weapons of mass destruction has emerged as a major topic of international security in the post Cold War world This compendium of articles published in The Washington Quarterly between 1991 and 1995 describes the changing nature of the problem discusses new trends in nonproliferation and counterproliferation policy identifies new arms control challenges at the regional and global levels and concludes by addressing the global politics of proliferation *Principles Of International Politics: People's Power, Preferences, and Perceptions, 3rd Edition* Bruce Bueno De Mesquita, 2006 Leaders want to stay in power Their self interest is the decisive motivation for action in the international arena and forms the theoretical backbone for this exciting departure from other introductory international relations texts Through its discussion and development of the strategic perspective Principles of International Politics shows students how leaders translate their personal interests and ambitions into actions of the state and convincingly demonstrates how international and domestic politics are inextricably linked Clearly explaining both the foundational ideas of international relations as well as the key concepts of the strategic perspective Bueno de Mesquita effectively links these to the analytic tools students will employ throughout

Handbook of Game Theory with Economic Applications: Zero-sum two-person games Robert J. Aumann, Sergiu Hart, 1992 *Hegemony and the US-Japan Alliance* Misato Matsuoka, 2018-06-14 It is widely recognised that the increasing importance of the US Japan alliance is strongly linked to emerging threats in the Asia Pacific with China's rise and the ambitions of North Korea having brought the two allies closer together This book however seeks to question whether these factors are indeed the sole determinants of this enduring alliance A pioneering study conducted through the lens of neo Gramscianism this book unravels the intricate political dynamism involved in the US Japan alliance It provides an innovative attempt to link the concept of alliances to hegemony and thus examines Japan's relationship to US dominance in the region Building on existing scholarship it also seeks to examine how Japan's continuing dependence on the US and the burden it places on citizens living near US military bases may affect the durability of the alliance in the post Cold War era As such this book presents an alternative theoretical tool in the field of international relations to analyse the political nature of the alliance as well as US hegemony in the region This book will be useful to students and scholars of Japanese Politics and foreign policymaking as well as International Relations and Security Studies more generally **Disarmament**, 1988
