Ea One True Thing:

In Defense of Common Sense Lodi Nauta, 2009 One of the leading humanists of Quattrocento Italy Lorenzo Valla ca 1406-1457 has been praised as a brilliant debunker of medieval scholastic philosophy In this book Lodi Nauta seeks a more balanced assessment presenting us with the first comprehensive analysis of the humanist's attempt at radical reform of Aristotelian scholasticism This study examines Valla's attack on major tenets of Aristotelian metaphysics showing how Valla employed common sense and linguistic usage as his guides It then explicates Valla's critique of Aristotelian psychology and natural philosophy and discusses his moral and religious views including Valla's notorious identification of Christian beatitude with Epicurean pleasure and his daring views on the Trinity Finally it takes up Valla's humanist dialectic which seeks to transform logic into a practical tool measured by persuasiveness and effectiveness Nauta firmly places Valla's arguments and ideas within the contexts of ancient and medieval philosophical traditions as well as renewed interest in ancient rhetoric in the Renaissance He also demonstrates the relevance of Valla's conviction that the philosophical problems of the scholastics are rooted in a misunderstanding of language Combining philosophical exegesis and historical scholarship this book offers a new approach to a major Renaissance thinker

Early Modern Philosophers and the Renaissance Legacy Cecilia Muratori, Gianni Paganini, 2016-09-27 When does Renaissance philosophy end and Early Modern philosophy begin Do Renaissance philosophers have something in common which distinguishes them from Early Modern philosophers And ultimately what defines the modernity of the Early Modern period and what role did the Renaissance play in shaping it The answers to these questions are not just chronological This book challenges traditional constructions of these periods which partly reflect the prejudice that the Renaissance was a literary and artistic phenomenon rather than a philosophical phase The essays in this book investigate how the legacy of Renaissance philosophers persisted in the following centuries through the direct encounters of subsequent generations with Renaissance philosophical texts This volume treats Early Modern philosophers as joining their predecessors as conversation partners the conversations in this book feature among others Girolamo Cardano and Henry More Thomas Hobbes and Lorenzo Valla Bernardino Telesio and Francis Bacon René Descartes and Tommaso Campanella Giulio Cesare Vanini and the anonymous Theophrastus redivivus

Baptism and Change in the Early Middle Ages, c.200-c.1150 Peter Cramer, 2003-10-30 An inquiry into the baptismal rite and how far medieval lay people understood church liturgy

The Twin Film Phenomenon Lauren Rosewarne, 2025-11-18 This book examines the recurring phenomenon in film and television where two strikingly similar productions are released in close succession Examples include *Armageddon* 1998 and *Deep Impact* 1998 *A Bug's Life* 1998 and *Antz* 1998 and more recently the 2019 *Fyre Festival* documentaries and the 2024 *Prince Andrew* docudramas Drawing from hundreds of cases this book explores why these twin productions emerge the industrial

and creative forces that drive them and how they reflect broader trends in media history. Situating this pattern within the fields of remake adaptation and media multiplicities studies, this book provides a comprehensive analysis of this largely understudied yet pervasive phenomenon. Each chapter examines different motivations behind the creation of twin films and TV shows, from economic imperatives and competitive market dynamics to shared cultural anxieties and trends in audience demand. This book presents a meticulous catalogue of examples demonstrating how genres and themes gain traction simultaneously across different studios and networks. In addition to offering historical insights, this book engages with contemporary debates on media repetition, nostalgia, and Hollywood's fixation on reproducing familiar narratives. Written by an author with extensive expertise in media studies, this book combines exhaustive research with a clear, accessible style, making it an essential resource for understanding the mechanisms behind content duplication in the entertainment industry. Academically, this book contributes to scholarship in film, television, and media studies by applying an interdisciplinary approach that integrates political science, feminist theory, and cultural analysis. It draws on close readings of films, industry reports, and a dataset of critical reviews to provide fresh perspectives on media production and consumption. As a valuable resource for students and scholars alike, it enriches discussions on screen media, industrial production, and the cultural forces shaping contemporary entertainment.

A General Dictionary, Historical and Critical Pierre Bayle, 1739

The British Union Paul J. McGinnis, Arthur H. Williamson, 2017-03-02

De Unione Insulae Britannicae The British Union is a unique seventeenth-century tract that urged the fusion of the Scottish and English kingdoms into a new British commonwealth with a radically new British identity. Its author, David Hume of Godscroft (1588–1630), was a major intellectual figure in Jacobean Scotland and the leading Scottish critic of the Anglicizing policies of James VI. The tract was written in two parts. Published in London in 1605, the first part provides a general outline of the imperative of union. The second consists of political and constitutional proposals whereby such a union might be achieved. Its publication was suppressed, and it exists only in manuscript. This is the first translation of the tract. Hume's work is breathtakingly contemporary in some of the proposals that it makes: regional assemblies combined with a national parliament and a call for efforts to inspire the Scottish and English people into a sense of common purpose. The language and ideas of the tract display characteristics of the Renaissance combined with elements that visibly anticipate the Enlightenment. The *De Unione* offers extraordinary insight into the European intellectual world prior to the rise of romantic nationalism in the early nineteenth century.

The Works of Plato Plato, 1901

Medieval Metaphysics of Artefacts, 1250–1500 Kamil Majcherek, 2025-02-13

Are artefacts that is human-made objects distinct from the natural things that they are made out of? For example, is a chair a thing distinct from the pieces of wood used in making it? This question is intensely debated in contemporary metaphysics, but it is little known that there was an equally heated and sophisticated debate concerning this issue in the late Middle Ages. This book provides the first comprehensive reconstruction, analysis, and evaluation of this discussion, looking at both the most famous figures such as

William of Ockham as well as dozens of previously unstudied texts available in manuscript form only *The Electrical Review* ,1922 The New Yorker Harold Wallace Ross,William Shawn,Tina Brown,David Remnick,Katharine Sergeant Angell White,Rea Irvin,Roger Angell,1929 Friends' Intelligencer ,1925 **Jersey Bulletin and Dairy World** ,1910
