Early Adopter J:

The Geography of Beer Nancy Hoalst-Pullen, Mark W. Patterson, 2020-03-02 This book builds on the highly successful *Geography of Beer Regions Environment and Society* 2014 and investigates the geography of beer from two expanded perspectives culture and economics The respective chapters provide case studies that illustrate various aspects of these themes As the beer industry continues to reinvent itself and its economic and cultural geographies this book showcases historical current and future trends at the local regional national and international scales **Koine Formation and Society** Randi Neteland, 2019-10-11 Massive in migration to a new town leads to socio cultural and linguistic contact and inevitably change Which linguistic features are preferred in the new dialect Why do these features prevail And how does language use in the wider society influence the local process Randi Neteland explores local and national conditions of koine formation in *Koine Formation and Society* using three Norwegian industrial town dialects as main examples The koine formation is characterized by a complex interplay between social and linguistic factors such as in migration rate migrants social characteristics housing conditions social class distinctions in migrants dialect background and linguistic distinctions among the varieties in contact However Neteland contextualizes the industrial towns within the larger society from which the in migrants originate and these case studies reveal to what extent the language use and norms for language use operating in the wider speech community can also influence the outcome of the koine formation In *Koine Formation and Society* Neteland explores how the social and linguistic factors work together and discusses determining factors and constraints on the local and national level The Decision to Patent Alexandra Zaby, 2010-08-22 This book provides a thorough analysis of the decision to apply for a patent Unlike many other theoretical approaches the negative effect a patent may have due to the disclosure requirement linked to every patent application is taken into account Seen in this light the effects driving the propensity to patent can be identified as the opposing forces of a protective and a disclosure effect The theoretical investigation includes an analysis of patenting behavior in a setting with vertically and horizontally differentiated products Due to imperfect patent protection competitors of the patentee may enter the market for the innovative product despite a patent An empirical investigation of the theoretical results with data from the 2005 Mannheim Innovation Panel in combination with patent information from the European Patent Office provides strong evidence for the main conclusions Earth Science Satellite Applications Faisal Hossain, 2016-05-21 The combined observational power of the multiple earth observing satellites is currently not being harnessed holistically to produce more durable societal benefits We are not able to take complete advantage of the prolific amount of scientific output and remote sensing data that are emerging rapidly from satellite missions and convert them quickly into decision making products for users The current application framework we have appears to be an analog one lacking the absorption bandwidth required to handle scientific research and the voluminous petabyte scale satellite data This book will tackle this question How do we change this course and take full

advantage of satellite observational capability for a more sustainable happier and safer future in the coming decades
