**Saving livelihoods saves lives 2018** Food and Agriculture Organization of the United Nations,2019-05-23 In recent years the number of people experiencing acute hunger has been persistently high And 2018 was no exception Some 113 million people in 53 countries were acutely hungry last year That is 113 million girls boys men and women old and young who were unable to access enough food and required humanitarian assistance to meet their most basic needs For FAO building resilient agriculture based livelihoods and food systems is at the core of efforts to fight acute hunger and avert food crises We know how critical humanitarian assistance is At the same time it is clear that humanitarian assistance on its own is not enough to win the battle against acute hunger That

is why FAO's humanitarian work is firmly embedded within a foundation of resilience building. And this was really demonstrated in 2018 when the breadth of our work extended from immediate humanitarian response to protect lives and livelihoods in some of the most complex contexts in the world including South Sudan and Yemen to addressing the vulnerability of pastoral populations and facilitating the development of livestock feed balances in the Horn of Africa to supporting disaster risk reduction efforts from Myanmar to Central America. Publications such as this offer us an opportunity to reflect on some of our achievements over the past year and identify how we can do better in the next. It is not intended as an exhaustive list of the work done under FAO's strategic programme on resilience but rather a snapshot to demonstrate what we can achieve and how much more this to be done.

**Reasonable Children** Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it's dispelled. Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness. Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills. Reasonableness itself he shows can be best cultivated through

the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
